Fraud and Education Harold J. Noah, Max A. Eckstein, 2001 Fraud and Education gives an informative overview of cheating in examinations in the U S and foreign countries and of the current state of fraud in education and research It differs however from many popular treatises on the same subject in that it is not intended as a blanket

condemnation of American or foreign education Instead of assigning blame for the prevalence of fraud the authors point to such factors as growth in the number of persons engaged in education and research pressures on individuals to succeed improvements in communications especially the Internet and e mail and in techniques of document reproduction **Gender and Fair Assessment** Warren W. Willingham,Nancy S. Cole,2013-12-16 There have been many important changes in the participation of women and men in American society over the past quarter century Tests play a role in those changes by providing evidence of the diverse achievement and proficiency of women and men They aid the learning process and reflect inequalities in opportunity to learn and participate In addition they provide useful information in considering what alternatives in education and work make most sense for individuals and influence views about groups of students educational programs and a wide range of issues For all of these reasons it is important that tests assess fairly and reflect accurately the ways young people are and are not achieving as well as desired The test performance of women and men is a research topic of historical interest and has received much attention in recent years Because of this increased interest there is a great deal of new research and data available The purpose of the study presented in this volume was to review this new information with two objectives in mind to clarify patterns of gender difference and similarity in test performance and related achievements and to see what implications those findings might have for fair assessment and as a corollary examine the assessment process as a possible source of gender differences This study is interested in tests used in education to assess developed knowledge and skill In order to gain a broader view of gender similarity and difference the contributors looked at other types of measures and other characteristics of young women and men Their hope is to contribute to a firmer basis for insuring fairness in tests an objective which is particularly important as the field moves increasingly to new forms of assessment in which there is less experience **Resources in Education** ,1988 **Dispute Resolution** ,1988 Research in Education ,1974 *Update*, 1980 New York Times Staff,1980 The Reign of ETS Allan Nairn,1980 The Ralph Nader report on the Educational Testing Service **Adolescent Psychology, 2001-2002** Eileen Astor-Stetson,Anita M.
