

# CHEMISTRY C500

Chemistry C500 takes you on an introductory tour of chemistry with all classic experiments. Discover colorful ways to test acids and bases using indicators. Create fizz reactions to learn about carbon dioxide gas. Perform entertaining "magic" tricks for your friends and then explain them with chemistry. Make foamy concoctions to explore water and soap. Write messages with invisible ink and then use a chemical reaction to reveal them. Investigate metals and salts in electrochemical experiments using a 9-volt battery (not included). Learn how to use common lab tools such as test tubes, pipettes, measuring devices, and safety goggles. See for yourself how chemistry goes far beyond textbooks and laboratories to explain occurrences that happen around us every day. The full-color experiment manual gives step-by-step illustrated instructions for setting up and performing each experiment, and then clear explanations of what happened and why. This kit is ideal for children who express a budding interest in chemistry and provides an excellent introduction to the CHEM Series of chemistry sets by Thames & Kosmos.
