Stoichiometry Particle Drawings

1. The law of conservation of mass says that in a chemical reaction, the mass at the beginning (the reactants) will equal the mass at the end. Explain why this is in terms of what is happening at the particle level.

For the following reactions, balance the equation, then draw particle drawings showing what the coefficients actually represent. Be sure your drawings accurately show the law of conservation of mass!

Mole-Mole Stoichiometry Problems

Balance the following equations. Then solve the problems. Show your work and label your answers!

Caveman Chemistry Kevin M. Dunn, 2003 Half a million years ago our ancestors learned to make fire from scratch They crafted intricate tools from stone and brewed mind altering elixirs from honey Their descendants transformed clay into pottery wool into clothing and ashes into cleansers In ceramic crucibles they won metal from rock the metals lead to colored glazes and glass Buildings of brick and mortar enshrined books of parchment and paper Kings and queens demanded ever more colorful clothing and accessories in order to out class clod hoppers and call girls Kingdoms rose and fell by the power of saltpeter sulfur and charcoal And the demands of everyday folk for glass and paper and soap stimulated the first round of chemical industrialization From sulfuric acid to sodium carbonate From aniline dyes to analgesic drugs From blasting powder to fertilizers and plastics In a phrase From Caveman to Chemist Your guides on this journey are the four alchemical elements Fire Earth Air and Water These archetypical characters deliver first hand accounts of the births of their respective technologies The spirit of Fire for example was born in the first creature to cultivate the flame This spirit passed from one person to another from one generation to another from one millennium to another arriving at last in the pages of this book The spirit of Earth taught folks to make tools of stone the spirit of Air imparted knowledge of units and the spirit of Water began with the invention of spirits Having traveled the world from age to age who can say where they will find their next home Perhaps they will find one in you
