Fraenkel-Conrat,1977-03-01 The time seems ripe for a critical compendium of that segment of the biological universe we call viruses Virology as a science having passed only recently through its descriptive phase of naming and numbering has probably reached that stage at which relatively few new truly new viruses will be discovered Triggered by the intellectual probes and techniques of molecular biology genetics biochemical cytology and high resolution microscopy and spectroscopy the field has experienced a genuine information explosion Few serious attempts have been made to chronicle these events This comprehensive series which will comprise some 6000 pages in a total of about 22 volumes represents a commitment by a large group of active investigators to analyze digest and expostulate on the great mass of data relating to viruses much of which is now amorphous and disjointed and scattered throughout a wide literature In this way we hope to place the entire field in perspective and to develop an invaluable reference and sourcebook for researchers and students at all levels This series is designed as a continuum that can be entered anywhere but which also provides a logical progression of developing facts and integrated concepts Microbiology Abstracts ,1994 Index to Theses with Abstracts Accepted for Higher Degrees by the Universities of Great Britain and Ireland and the Council for National Academic Awards ,2004 Theses on any subject submitted by the academic libraries in the UK and Ireland **Regulation of Body Weight** Claude Bouchard,G. A. Bray,1996-06-19 The fact that about 30 40% of the adults in the Western world are overweight or obese testifies to the frequency of the disturbances in body weight regulation Scientists have established that caloric intake macronutrient composition of the diet basal and resting metabolic rate thermic response to food energy expenditure associated with movement and physical activity and preferential storage of the surplus of calories as fat or lean tissues are critical determinants of energy balance and body weight While much has been learned the field is poised for major advances with the advent of a variety of imaging techniques progress in quantitative and molecular genetics use of transgenic rodent models and of breeding experiments with informative inbred strains availability of stable isotopes for metabolic and behavioral studies and a growing number of useful experimental animal and human models This volume takes an integrative approach to obesity It is structured around four major topics 1 the animal and human models currently available for the study of body weight regulation with their strengths and limitations 2 the molecular and genetic basis of the regulation of body weight 3 the metabolic and physiological mechanisms involved and 4 the behavioral and social determinants The 13 background papers provide a critical overview of the present knowledge base while the group reports summarize the extensive deliberations of 38 international experts Particular emphasis has been given to promising research areas and on the advances needed to ensure a better understanding of the biological and behavioral mechanisms of the regulation of body weight with a particular emphasis on overweight and obesity Cambridge Scientific Biochemistry Abstracts ,1989 Holland-Frei Cancer Medicine 8 James F. Holland,2010 Holland Frei Cancer Medicine serves as a quick reference to current information on an extensive list of cancers including breast lung thyroid

colorectal ovarian prostate and gastric cancer to name but a few Presented as an accessible pocket sized handbook the chapters are organized in an outline format offering only the most essential information on the etiology staging including TNM staging and treatment for each cancer type Individual chapters are devoted to the molecular biology of cancer cancer prevention cancer screening the mechanisms of chemotherapy and diagnostic imaging in cancer Additionally each chapter lists all the major phase III clinical trials and therefore serves as an excellent reference of the major randomized controlled trials for each cancer reported to date Specific chapters are also dedicated to the discussion of oncologic emergencies pain and palliation and prescription complications At the conclusion of the book a glossary of oncologic terms and chemotherapeutic drug programs a table of common cancer incidences and an overview of the mechanisms common uses and related toxicities of various anti cancer agents are featured In addition performance status tables mathematical formulas and a listing of common biomedical cancer web sites are highlighted
