Shepardson,1999 The prospect of Allied victory helped to bring the disintegration of the grand alliance and a return to the Soviet Western rivalry which existed prior to World War II The final part of the book deals with the defeat of Japan and the controversy surrounding the atomic bomb BOOK JACKET *Our Country* Herbert J. Bass,1991 Geopolitics of European Union Enlargement Warwick Armstrong,James Anderson,2007-04-24 Offers an integral picture of the EU s internal and external borders to reveal the processes of re bordering and social change currently taking place exploring issues such as security immigration economic development and changing social and political attitudes Spirits of the Cold War Ned O'Gorman,2012 In spring of 1953 newly elected President Eisenhower sat down with his staff to discuss the state of American strategy in the cold war America he insisted needed a new approach to an urgent situation From this meeting emerged Eisenhower s teams of bright young fellows charged with developing competing policies each of which would come to shape global politics In *Spirits of the Cold War* Ned O Gorman argues that the early Cold War was a crucible not only for contesting political strategies but also for competing conceptions of America and its place in the world Drawing on extensive archival research and wide reading in intellectual and rhetorical histories this comprehensive account shows cold warriors debating worldviews in addition to more strictly instrumental tactical aims *Spirits of the Cold War* is a rigorous scholarly account of the strategic debate of the early Cold War a cultural diagnostic of American security discourse and an examination of its origins **The Politics of Responsibility** Chad Lavin,2023-12-11 Politics cannot function without responsibility but there have been serious disagreements about how responsibility is to be understood and huge controversies about how it is to be distributed rewarded legislated and enforced The liberal notions of personal responsibility that have dominated political thinking in the West for more than a century are rooted in the familiar territory of individual will and causal blame but these theories have been assailed as no longer adequate to explain or address the political demands of a global social structure Informed by Marx Foucault and Butler Chad Lavin argues for a postliberal theory of responsibility formulating responsibility as a process that is anchored in a persistent ability to respond not reproach Lavin works this formulation through discussions of contemporary political issues such as globalization police brutality and abortion Rather than assigning individual blame postliberal responsibility challenges the supposed autonomy of individual subjects by taking structural arguments into account Lavin concludes that a liberal concept of responsibility gives rise to a moralistic and oppressive approach to social problems while a postliberal approach highlights a shared responsibility for developing collective solutions to systemic problems Postliberal responsibility not only suggests more generous and democratic responses to social ills it also allows us to theorize a greater

range of issues that demand political response **Kesselring's Last Battle** Kerstin von Lingen, 2009 Revisits the war crimes trial of Albert Kesselring commander in chief of German troops in Italy during World War II who was sentenced to death for the killing of thousands of civilians in Italy Reveals how the commutation of that death sentence was one of the earliest maneuverings in the nascent Cold War **Regime Theory in the Post-Cold War World** Robert M. A.

Crawford, 1996 This book explores theoretical accounts of the evolution of cooperation in international political economic relations focussing on the dominant approach of international regimes principles norms rules and decision making procedures around which actors expectations converge The author exposes serious weaknesses in mainstream neoliberal applications of the regime concept and suggests that use of the concept precludes examination of political considerations and structural characteristics that might better account for cooperative dynamics in the modern era and their potential trajectory in the Post cold War World The Reagan Presidency W. Elliot Brownlee, Hugh Davis Graham, 2003 Table of contents

Native Activism in Cold War America Daniel M. Cobb, 2008 Broadens the scope and meaning of American Indian political activism by focusing on the movement's early and largely neglected struggles revealing how early activists exploited Cold War tensions in ways that brought national attention to their issues *The Cold War and After* Marc

Trachtenberg, 2012 A new way of looking at international relations from a leading expert in the field What makes for war or for a stable international system Are there general principles that should govern foreign policy In *The Cold War and After* Marc Trachtenberg a leading historian of international relations explores how historical work can throw light on these questions The essays in this book deal with specific problems with such matters as nuclear strategy and U S European relations But Trachtenberg's main goal is to show how in practice a certain type of scholarly work can be done He demonstrates how in studying international politics the conceptual and empirical sides of the analysis can be made to connect with each other and how historical theoretical and even policy issues can be tied together in an intellectually respectable way These essays address a wide variety of topics from theoretical and policy issues such as the question of preventive war and the problem of international order to more historical subjects for example American policy on Eastern Europe in 1945 and Franco American relations during the Nixon Pompidou period But in each case the aim is to show how a theoretical perspective can be brought to bear on the analysis of historical issues and how historical analysis can shed light on basic conceptual problems *Economic Adjustment After the Cold War* Michael Renner, 1992 This book looks at the

problems and opportunities of a switchover of skills equipment and other resources from military purposes to civilian uses with particular reference to recent events in Eastern Europe In Part 1 the author surveys the extent of the military economy and suggests that its different components imply distinct adjustment needs
