Voluntary Environmental Agreements Patrick ten Brink,2017-08-25 Voluntary environmental agreements VEAs generally agreements between government and business have been regarded by many as a key new instrument for meeting environmental objectives in a flexible manner Their performance to date has however also led to considerable criticism with several parties arguing that they are methods for avoiding real action that goes beyond business as usual Is either of these positions justified The aim of this book is to highlight and learn the lessons from existing experience looking not just at results but also at specific elements of agreements and also at the process of the agreement itself Lessons are drawn from experience from across the world covering the full range of environmental challenges and from the perspective of key stakeholder groups Importantly the book also presents tools for assessing and improving existing agreements and includes recommendations and guidelines for future agreements in key areas such as climate change It also deals at length with the problem of how such agreements might be used in developing and transitional

economies The overall view of the book is that there is a real potential for the future use of VEAs as part of the policy mix and as a tool for sharing the responsibility for meeting environmental objectives For the agreements to play this role however significant steps are needed to ensure that they are effective efficient equitable and appropriately linked to a portfolio of other instruments The book is divided into four sections First existing agreements their development and efficacy are considered second the prospects for voluntary agreements in developing and transitional economies are discussed third a range of authors examine the role of VEAs as part of the policy mix to combat climate change and finally the book concludes with an examination of how new tools for evaluating and improving VEAs could be utilized in the future Voluntary Environmental Agreements will be of interest not only to academics governments and businesses wishing to understand this specific instrument but also to those already implementing or considering applying VEAs to meet their environmental objectives
