

### Living things need food and water

All living things need food and water to stay alive. Food also gives us energy to work.

Plants make their own food with the help of air, water and sunlight. The food making process in plants is called photosynthesis.

Animals cannot make their food. They eat plants and flesh of other animals.

Non-living things do not need food and water.

Photosynthesis

### Living things feel

Living things act according to what they feel. Animals have sense organs to feel things. When you touch ice-cube, your fingers feel cold. When you touch anything hot, you quickly pull your finger away. Why? Because it feels pain.

Plants do not have sense organs, still they feel. The leaves of touch-me-not plant (Chhuimui) close down if you touch them. Non-living things do not feel.
