## Friction

1. A crate filled with delicious junk food rests on a horizontal floor. Only gravity and the support force of the floor act on it, as shown by the vectors for weight  $W$  and normal force  $n$ .
  - a. The net force on the crate is (zero) (greater than zero).
  - b. Evidence for this is no acceleration.

2. A slight pull  $P$  is exerted on the crate, not enough to move it.
  - a. The force of friction  $f$  acting on the crate is (less than) (equal to) (greater than)  $P$ .
  - b. The net force on the crate is (zero) (greater than zero).

3. Pull  $P$  is increased until the crate begins to move. It is pulled so that it moves with constant velocity across the floor.
  - a. Friction  $f$  is (less than) (equal to) (greater than)  $P$ .
  - b. Constant velocity means acceleration is (zero) (greater than zero).
  - c. The net force on the crate is (less than) (equal to) (greater than) zero.

4. Pull  $P$  is further increased and is now greater than friction  $f$ .
  - a. The net force on the crate is (less than) (equal to) (greater than) zero.
  - b. The net force acts toward the right, so acceleration acts toward the (left) (right).

5. If the pulling force  $P$  is 150 N and the crate doesn't move, what is the magnitude of  $f$ ? 150 N
6. If the pulling force  $P$  is 200 N and the crate doesn't move, what is the magnitude of  $f$ ? 200 N
7. If the force of sliding friction is 250 N, what force is necessary to keep the crate sliding at constant velocity? 250 N
8. If the mass of the crate is 50 kg and sliding friction is 250 N, what is the acceleration of the crate when the pulling force is 250 N? 0 m/s<sup>2</sup> 300 N? 1 m/s<sup>2</sup> 500 N? 5 m/s<sup>2</sup>

## **Concept Development Practice Page 15 Page 59:**

Experimentation Matters Stefan H. Thomke, 2003-08-05 Every company's ability to innovate depends on a process of experimentation whereby new products and services are created and existing ones improved. But the cost of experimentation is limiting. New technologies including computer modeling and simulation promise to lift that constraint by changing the economics of experimentation. They amplify the impact of learning, creating the potential for higher R D performance and innovation and new ways of creating value for customers. Stefan H. Thomke argues that to unlock such potential, companies must not only understand the power of new technologies for experimentation but also fundamentally change their processes, organization, and management of innovation. He shows why experimentation is so critical to innovation, explains the impact of new technologies, and outlines what managers must do to integrate them successfully.

**Automotive Software Architectures** Mirosław Staron, 2021-03-01 This book introduces the concept of software architecture as one of the cornerstones of software in modern cars. Following a historical overview of the evolution of software in modern cars and a discussion of the main challenges driving that evolution, Chapter 2 describes the main architectural styles of automotive software and their use in cars' software. Chapter 3 details this further by presenting two modern architectural styles: i.e. centralized and federated software architectures. In Chapter 4, readers will find a description of the software development processes used to develop software on the car manufacturers' side. Chapter 5 then introduces AUTOSAR, an important standard in automotive software. Chapter 6 goes beyond simple architecture and describes the detailed design process for automotive software using Simulink, helping readers to understand how detailed design links to high-level design. The new Chapter 7 reports on how machine learning is exploited in automotive software, e.g. for image recognition and how both on-board and off-board learning are applied. Next, Chapter 8 presents a method for assessing the quality of the architecture: ATAM (Architecture Trade-off Analysis Method) and provides a sample assessment, while Chapter 9 presents an alternative way of assessing the architecture, namely by using quantitative measures and indicators. Subsequently, Chapter 10 dives deeper into one of the specific properties discussed in Chapter 8: safety, and details an important standard in that area: the ISO/IEC 26262 norm. Lastly, Chapter 11 presents a set of future trends that are currently emerging and have the potential to shape automotive software engineering in the coming years. This book explores the concept of software architecture for modern cars and is intended for both beginning and advanced software designers. It mainly aims at two different groups of audience: professionals working with automotive software who need to understand concepts related to automotive architectures and students of software engineering or related fields who need to understand the specifics of automotive software to be able to construct cars or their components. Accordingly, the book also contains a wealth of real-world examples illustrating the concepts discussed and requires no prior background in the automotive domain. Compared to the first edition, besides the two new chapters 3 and 7

there are considerable updates in chapters 5 and 8 especially      **Basics Architecture 03: Architectural Design** Jane Anderson,2010-11-26 Basics Architecture 03 Architectural Design explains the process of designing architectural projects It describes the design studio and the activities that take place there The architectural design process is as diverse as the people who practise it all architects follows their own individual design process In this dynamic new text the realities of the design process and the relationship between education and practice are explored in detail The book introduces a variety of processes through examples and case studies This allows readers to identify with certain methods with which they could respond to in their own work and enables them to develop their own unique approach      *Growth in Arithmetic* John Roscoe Clark,1952      **Contemporary Nursing Knowledge** Jacqueline Fawcett,Susan DeSanto-Madeya,2012-11-27 The 3rd Edition of this AJN Book of the Year Award Winner helps you answer those questions with a unique approach to the scientific basis of nursing knowledge Using conceptual models grand theories and middle range theories as guidelines you will learn about the current state and future of nurse educators nurse researchers nurse administrators and practicing nurses      **Access to Power** Ijlal Naqvi,2022 Pakistan s power sector s woes are less mystery than tragedy but to conclude simply that a weak state produces poor governance outcomes misses the manner in which these arrangements are important to reproducing existing relations of domination and are resistant to change The question this book addresses therefore isn t just about why Pakistan doesn t produce enough power      *My Little Green Story Book, Pre-primer II* Odille Ousley,David H.
