Concept Mapping as an Assessment Tool for Conceptual Understanding in Mathematics Haiyue JIN, 2022-05-05

This book investigates the practicability and effectiveness of the concept map as a tool for assessing students conceptual understanding in mathematics. The author first introduces concept mapping and then employs it to investigate students conceptual understanding of four different mathematical topics. Alongside traditional scoring methods she adopts Social Network Analysis a new technique to interpret student constructed concept maps which reveals fresh insights into the graphic features of the concept map and into how students connect mathematical concepts. By comparing two traditional school tests with the concept map she examines its concurrent validity and discusses its strengths and drawbacks from the viewpoint of assessing conceptual understanding. With self designed questionnaires interviews and open ended writing tasks she also investigates students and teachers attitudes toward concept mapping and describes the implications these findings may have for concept mapping s use in school and for further research on the topic. Scholars and postgraduate students of mathematics education and teachers interested in concept mapping or assessing conceptual understanding in classroom settings will find this book an informative inspiring and overall valuable addition to their libraries. *Proceedings of the International Conference on Technology 4 Education 2024, Volume 1* Shitanshu Mishra, Aditi Kothiyal, Sridhar Iyer, Sameer Sahasrabudhe, Andreas Lingnau, Rita Kuo, 2025-09-26 This is volume one of the proceedings from the International Conference on Technology 4 Education 2024 T4E 2024 with each section consisting of distinct peer reviewed research papers making original contributions to research and academia.
