

6.3 Aquatic Ecosystems

Key Concepts

-  Ecologists classify aquatic ecosystems according to criteria such as salinity, depth, and whether the water is flowing or standing.
-  Standing freshwater ecosystems include ponds, lakes, inland seas, and wetlands. Flowing freshwater ecosystems include rivers and streams.
-  Estuaries are home to diverse ecosystems that prevent soil erosion and flooding.
-  The ocean can be divided into three zones based on their distance from shore: intertidal, neritic, and open ocean.

SKILL BUILDER Vocabulary Preview

Define each vocabulary term in your own words. Then, write yourself a quick note on how you will remember each. One term has been done for you.

Term	Definition	How I Remember
Salinity		
Photic zone		
Aphotic zone	The layer below the photic zone where no sunlight penetrates and photosynthesis cannot occur	I know the prefix a- can mean "without," so aphotic must mean "without light."
Benthic zone
