Chapter 28. Reflection and Refraction More Refraction—continued

5. The two transparent blocks (right) are made of different materials. The speed of light in the left block is greater than the speed of light in the right block. Draw an appropriate light path through and beyond the right block. Is the light that emerges displaced more or less than light emerging from the left block?

6. Light from the air passes through plates of glass and plastic below. The speeds of light in the different materials are shown to the right (these different speeds are often implied by the "index of refraction" of the material). Construct a rough sketch showing an appropriate path through the system of four plates.

Compared to the 50° incident ray at the top, what can you say about the angles of the ray in the air between and below the block pairs?

$$v = c$$

$$v = 0.6c$$

$$v = 0.7c$$

$$v = 0$$

$$v = 0.7c$$

$$v = 0.6c$$

$$v = c$$

7. Parallel rays of light are refracted as they change speed in passing from air into the eye (left below). Construct a rough sketch showing appropriate light paths when parallel light under water meets the same eye (right below).

If a fish out of water wishes to clearly view objects in air, should it wear goggles filled with water or with air?

8. Why do we need to wear a face mask or goggles to see clearly when under water?

Just Don't!

Hewitt, 1977 **Naturalism, Realism, and Normativity** Hilary Putnam, 2016-04-11 Hilary Putnam's writings have shaped epistemology, ethics, metaphysics, philosophy of physics and mathematics and philosophy of mind. This volume illustrates his willingness to revisit past arguments, above all how to articulate a theory of naturalism which acknowledges that normative phenomena form an ineluctable part of human experience.

Physics John D. Cutnell, Kenneth W. Johnson, 1994-08-02 This text is designed for a one year course in college physics that uses algebra and trigonometry. The book has three goals: to help students develop conceptual understanding of physical principles, the ability to reason and problem solving skill, to help students see that physics is a wonderfully integrated body of knowledge, to show students that physics principles come into play over and over again in their lives.

Conceptual Physical Science Paul G. Hewitt, John Suchocki, Leslie A. Hewitt, 2004 *Conceptual Physical Science* Third Edition takes learning physical science to a new level by combining Hewitt's leading conceptual approach and friendly writing style in a new edition that provides stronger integration of the sciences, more quantitative coverage and a wealth of new media resources to help professors in class and students out of class. The book's consistent high quality coverage includes five new chapters on chemistry, astronomy and earth science for an even more balanced approach to physical science. New Looking Forward and Looking Back boxes connect themes and concepts throughout the book, helping students see the big picture. More computational coverage, e.g. Figuring Physical Science in chapter calculation, allows students to practice the quantitative skills they need to master the concepts of physical science and be able to apply their knowledge. Looking Forward and Looking Back boxes in every chapter connect themes and concepts throughout the book, helping students see the big picture of physical science.
