1. Each of the vertically-suspended blocks has the same weight W . The two forces acting on Block C (W and rope tension T) are shown. Draw vectors to a reasonable scale for rope tensions acting on Blocks A and B.

2. The cart is pulled with force F at angle θ as shown. F_x and F_y are components of F .

a. How will the magnitude of F_x change if the angle θ is increased by a few degrees?

[more] [less] [no change]

b. How will the magnitude of F_y change if the angle θ is increased by a few degrees?

[more] [less] [no change]

c. What will be the value of F_x if angle θ is 90° ?

[more than F] [zero] [no change]

If you're into trig.

$$\sin \theta = \frac{F_y}{F} ; \text{ so } F_y = F \sin \theta.$$

$$\cos \theta = \frac{F_x}{F} ; \text{ so } F_x = F \cos \theta.$$

3. Force F pulls three blocks of equal mass across a friction-free table. Draw vectors of appropriate lengths for the rope tensions on each block.

4. Consider the boom supported by hinge A and by a cable B. Vectors are shown for the weight W of the boom at its center, and $W/2$ for vertical component of upward force supplied by the hinge.

a. Draw a vector representing the cable tension T at B. Why is it correct to draw its length so that the vertical component of $T = W/2$?

b. Draw component T_x at B. Then draw the horizontal component of the force at A. How do these horizontal components compare, and why?

5. The block rests on the inclined plane. The vector for its weight W is shown. How many other forces act on the block, including static friction? _____. Draw them to a reasonable scale.

a. How does the component of W parallel to the plane compare with the force of friction? _____

b. How does the component of W perpendicular to the plane compare with the normal force? _____

Special Education During the Pandemic Festus E. Obiakor, Tachelle Banks, Anthony F. Rotatori, 2024-06-01 The COVID 19 pandemic triggered and continues to trigger many changes in K 12 education some major like learning remotely from home and some minor like sitting farther apart on the school bus While most students have had routines interrupted the children perhaps most affected by that disruption are students with special education needs The challenges we currently face should not undermine what we have accomplished over the last 60 years to protect students with disabilities and those from traditionally marginalized backgrounds Instead we must take an honest proactive and collaborative approach to the challenges laid bare To do so we must reckon with the fact that during a pandemic that disproportionately impacted traditionally marginalized communities and people with disabilities we collectively dropped the ball for students receiving special education services and we need to consider the continued consequences Further we must acknowledge that many students with disabilities have found virtual and remote learning to be more liberating and accessible for their learning strengths needs and preferences This text addresses how we must reconcile disparate realities of the special educational experience during pandemic Students parents teachers and school officials must align themselves together so that they can provide necessary services and support systems to students with disabilities during unpredictable times These efforts will help leverage opportunities to disrupt improve and ignite educational experiences and opportunities for our children and youth particularly those with disabilities
