relativity with quantum mechanics may well spell the end of time Barbour writes with remarkable clarity as he ranges from the ancient philosophers Heraclitus and Parmenides through the giants of science Galileo Newton and Einstein to the work of the contemporary physicists John Wheeler Roger Penrose and Steven Hawking Along the way he treats us to enticing glimpses of some of the mysteries of the universe and presents intriguing ideas about multiple worlds time travel immortality and above all the illusion of motion The End of Time is a vibrantly written and revolutionary book It turns our understanding of reality inside out
