

CORPORATE GOVERNANCE MIND MAP ONE

WHAT IS CORPORATE GOVERNANCE?

I understand that Corporate governance comprises of all aspects the mind map and a lot more areas and parties involved such as: shareholders, stakeholders, managers, directors, transparency, accountability, etc.

I have thought about the relevance of this topic and I believe it is everything that has to do with the corporate world in business, how it should operate and the way operations is expected to meet certain standards.

There have been several accounts on the definition of what corporate governance is but I prefer the broad view to this topic which states corporate governance as a web of relationships, not only between the company and its owners (shareholders), but also between a company and a broad range of other stakeholders (Solomon, 2007).

I particularly like this definition because it highlights the importance of the relationship between the parties involved in an organisation. It has a subtle undertone that corporate governance should be dynamic and fluid and not just about following patterns. I believe corporate governance should border around this view. Bain and Band, (2016) explains that governance is essential for any organisation that wants to maximise effectiveness so it should not just about management, processes, laws, transparency, ethics, etc. but a mix of it all

Rock Center for Corporate Governance at Stanford University Working Paper Series Arthur and Toni Rembe Rock Center for Corporate Governance, 2008 Corporate Governance in the Public Services, 1994 *Europe's Corporate Governance Green Paper* Christoph Van der Elst, Erik P. M. Vermeulen, 2014 The European Commission launched a Green Paper on corporate governance aimed largely at listed companies in April 2011 The Green Paper recognizes that institutional investors play a dominant role in the current financial markets but it criticizes the short term thinking and practice among these investors Long term and appropriate shareholder engagement is viewed as the linchpin of an effective corporate governance framework The question arises however if institutional investors should be actively engaged if they lack the time knowledge and a financial incentive to do so We introduce and briefly discuss shareholder engagement costs that policymakers should take into account when increasing shareholders rights and betting on institutional investors to protect companies against business failures The engagement costs considered here are 1 conventionalism micro management 2 management distraction 3 risk aversion and 4 lack of transparency

Corporate Governance Elaine Sternberg, 2004 Corporate governance has come to prominence in recent years because of the perceived political importance of issues such as executive pay and apparent accounting scandals As might be expected in this frenzied climate politicians have reacted US politicians reacted with particular speed through the passing of the Sarbanes Oxley Act Dr Elaine Sternberg brings some sobriety and clear thinking to the debate in this new and fully revised edition of Corporate Governance Accountability in the Marketplace lucidly defining the purposes of corporate

governance and analysing different models of corporate regulation The Anglo American model allows corporations to fulfil their corporate purposes more effectively than the stakeholder or the German Japanese models Given that problems of executive pay accounting scandals and so on result in corporations not achieving their proper purposes Sternberg finds that a change in the regulatory model cannot be the answer Instead she proposes that we should look at the ways in which regulation prevents the Anglo American model from working in practice as effectively as it should in theory Sternberg shows how a genuine market in corporate governance could be created so that firms had to compete for funds with their mode of governance being one of the attractions to potential shareholders *Management working paper* Ken L.
