

Introduction

There are some very simple checks that need only take a few minutes to carry out, but that could save you much inconvenience and expense.

These weekly checks require no great skill or special tools and the small amount of time they take to perform could prove to be very well spent, for example:

□ Keeping air, fuel, oil, tyre condition and pressures, will not only help to stop them wearing out prematurely but could also save you a lot.

□ Many breakdowns are caused by electrical problems. Battery, wipers, lights, are particularly common and a quick check on a regular basis will often prevent the majority of these.

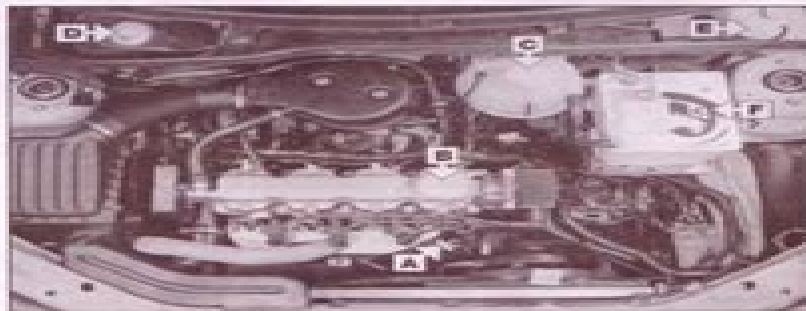

□ If your car develops a brake fluid leak, the first time you might notice about it is when your brakes don't work properly. Checking this level regularly will give warning of this kind of problem.

□ If the oil or coolant levels run low, the cost of replacing any engine damage will be far greater than fixing the leak, for example.
