Congress. Senate. Committee on Appropriations,1973 The National Union Catalog, Pre-1956 Imprints ,1968 Energy Policy in Perspective Craufurd D. Goodwin,1981 This first attempt to trace the history of U S energy policy since World War II underscores the confusion and diffusion that have characterized American efforts to deal with energy questions Despite the numerous presidential committees commissions and task forces as well as the many special offices and agencies established during the postwar years surprisingly little useful policy has been formulated This failure has been especially costly during a four decade era that has seen a drastic shift from abundant energy to acute shortage from falling prices for producers to steep price rises for consumers and from energy self sufficiency to increasing dependency on foreign sources It is a failure that has left Americans all the more unprepared to deal with the necessary and difficult transition from oil to a substitute form of energy By exploring past approaches to energy policy the authors hope to promote public understanding of an important subject and to help policymakers cope with increasingly complex energy problems Book jacket
