*The Proliferation of Privileged Partnerships between the European Union and its Neighbours* Sieglinde Gstöhl, David Phinnemore, 2019-06-26 This edited volume provides a timely analysis of the European Union's privileged partnerships with neighbouring countries identifying key points of comparison. It analyses which policy areas are covered and why the reasons why a specific institutional arrangement has been chosen, the major advantages and shortcomings for both sides and how effectively the privileged partnerships have worked in practice. Drawing on a number of case studies, the book highlights critical junctures and path dependence in the EU's external relations and examines what general lessons can be drawn regarding privileged partnerships in particular with a view to the UK's post-Brexit relationship with the EU. This book will be of key interest to scholars, students and practitioners in EU affairs, European politics, diplomacy studies and more broadly to international relations and law.

**Balanced Phono-Amps** Burkhard Vogel, 2019-03-28 This extensively reworked 2nd edition of the book includes ten new chapters. It also features an updated discussion of simulation software tools covering topics such as simulating complex and/or expensive amplifier structures with the free LTspice software by developing a broad range of additional simulation models, especially those for triodes and transformers. The book adopts the structure used in *The Sound of Silence* books with the first part, Basics: Calculations and Simulations, providing deep simulation-triggered insights into the gain and noise mechanisms of differential amplifiers, BJTs, resistors and triodes. The second part then discusses the RIAA Phono Amp Engine II, describing all the necessary design, simulation, calculation, construction and measurement processes for this multi-functional MC amplifier. The third part, Knowledge Transfer, presents new ideas on draft designs of the linear low-noise MC input stages, also an extremely low-noise one, and a range of practical measurement tools. Additionally, it includes a chapter on MM amplifiers and their noise production and offers some surprising solutions. The brand new and extensive chapter on all the simulation models developed and used in the book rounds out the voyage through the jungle of compromises, allowing best-in-class balanced MC phono amplifiers to be produced. Lastly, the book also features an extensive index and free downloads of all Mathcad worksheets are available on Springer's Extra Materials website: <https://extras.springer.com> query 978 3 319 36890 0.

**Advances in Botanical Research**, 2022-07-01 Lignin is a large phenolic polymer found in the cell wall of most land plants. Volume ABR104 provides in-depth reviews on the most recent discoveries in the field. It revisits the lignin paradigm and reviews the occurrence of unconventional lignin precursors that are derived from both the monolignol biosynthetic pathway and from other polyphenolic biosynthetic pathways. The volume encompasses the most recent data about the regulation of lignin biosynthesis in an environment of polysaccharides, the importance of oxidases, the pivotal role of feruloylation and coumaroylation of the cell wall, both in the lignified stem and in the cereal grain. The volume gives an

important part to the transcriptional regulation at different scales At last vibrational and fluorescence microscopy methods to characterize the lignin decorated cell wall as well the most recent bioengineering approaches towards lignin modification are reviewed The paradigm of lignin polymer expanded to new discovered compounds The fluorescence and vibrational microscopy to detect lignin and phenolics Spatial and timed transcriptional regulation of lignification **The Land**

**Question in Palestine, 1917-1939** Kenneth W. Stein, 2017-03-01 The control of land remains the crucial issue in the Arab Israel conflict Kenneth Stein investigates in detail and without polemics how and why Jews acquired land from Arabs in Palestine during the British Mandate and he reaches conclusions that are challenging and suprising Stein contends that Zionists were able to purchase the core of a national territory in Palestine during this period for three reasons they had the single mindedness of purpose as well as the capital to buy the land the Arabs economically impoverished politically fragmented and socially atomized were willing to sell the land and the British were largely ineffective in regulating land sales and protecting Arab tenants Neither Arab opposition to land sales nor British attempts to regulate them actually limited land acquisition There were always more Arab offers to sell land than there were Zionist funds In fact many sales were made by Arab politicians who publicly opposed Zionism and even led agitation against land acquisition by Jews Zionists furthered their own ambitions by skillfully using their understanding of the bureaucracy to write laws and to influence key administrative appointments Further they knew how to take advantage of social and economic cleavages within Arab society Based primarily on archival research *The Land Question in Palestine 1917 1939* offers an unusually balanced analysis of the social and political history of land sales in Palestine during this critical period It provides exceptional and essential insight into one of the most troubling conflicts in today s world **Islamophobia and Lebanon** Ali Kassem, 2023-01-26 Thinking through
