*General Principles of Law in the Decisions of International Criminal Courts and Tribunals* Fabián Raimondo, 2008-11-30 International lawyers usually disregard the vital functions that general principles of law may play in the decisions of international courts and tribunals As far as international criminal law is concerned general principles of law may be crucial to the outcome of an international trial inter alia because the conviction of an accused in respect of a particular charge may depend on the existence of a given defence under this source This volume examines the role that general principles of law have played in the decisions of international criminal courts and tribunals In particular it analyses their alleged subsidiary nature their process of determination and their transposition from national legal systems into international law It concludes that general principles of law have played a significant role in the decisions of international criminal courts and tribunals not only by filling legal gaps but also by being a fundamental means for the interpretation of legal rules and the enhancement of legal reasoning

This book indicates the shortcomings of the current international legal system and customary international norms that govern international aviation law to comply with contemporary air transport market realities As the air transport market develops globally the safety regime of civil aviation should also be governed and applied globally In this book the author departs from current international legal norms to examine the emerging legal field of global administrative law Through that lens the possibility of reconstructing the set of legal mechanisms that govern domestic and international administrative interaction in the global field of aviation safety is explored This book demonstrates that a legal system is never complete but always develops in tandem with changing needs i e the participation of the affected parties Exploring the principles of GAL theory contributes to addressing the contemporary legal issues relating to state compliance with international aviation safety standards that would otherwise not be covered by customary international law In particular the principles of GAL theory regarding global governance and the public character of global regulations the role of individuals and states in global governance and state sovereignty are considered valuable contributions to contemporary global aviation safety issues in practice It is asserted in this book that proper checks and balances in global aviation safety can be improved by making these accessible to individuals by way of national courts Finally establishing public awareness of global aviation safety standards will eventually create greater pressure on states to implement and enforce them This book is in an area increasing academic

and research interest of practitioners of public international aviation law global administrative law global governance and global aviation safety global air transport market regulations      **Journal of Comparative Legislation and International Law** ,1926      **The Publishers Weekly** ,1888      Leading Cases and Opinions on International Law Pitt Cobbett,1885
