Different Between Nsfas And Funsas:

The Youth Dividend Jan H. Hofmeyr, 2012 *ETDP SETA Scarce & Critical Skills Guide 2010/11*, *Higher Education*, 2023-11-02 COVID wrought havoc on the world's economic systems Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery systems Some institutions were prepared for the required transition to online learning Most were not Whether prepared or not educators rose to the challenge The innovativeness of educators met the challenges as digital learning replaced the face to face environment In fact some of the distance models proved so engaging that many students no longer desire a return to the face to face model As with all transitions some things were lost while others were gained This book examines practice in the field as institutions struggled to face the worst global pandemic in the last century The book is organized into four sections on Perils and Promises The State of Online Education Goals and Challenges of Online Learning and Innovations in the Age of COVID It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process These discussions shed light on the impact of the pandemic and the future of higher education post COVID Higher education has been forever changed and higher education as it once was may never return While many questions arise the achievements in meeting and overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic

Getting Skills Right: South Africa OECD, 2017-07-10 This report identifies effective strategies to tackle skills imbalances in South Africa *Creating the New African University*, 2023-05-25 Creating the New African University grapples with the existence of African universities particularly in post independent Africa where Higher Education Institutions HEIs are supposed to live up to the expectations of being adaptive in dealing with prevalent complex dynamic contemporary and future challenges facing African societies The book tackles the issue of what ought to be done for African universities to maintain a structure and identity that ensures their relevance in Africa's development through generating and transforming knowledge into actions for the common good It engages issues within the context of how post colonial transformative obligations have been managed in light of the prevalent epistemological and pedagogical underpinnings that form the foundations of these universities as they seek to break from the clutches of colonial legacies This book further highlights an urgent need to do away with silos and embrace a multidisciplinary interdisciplinary transdisciplinary and cross disciplinary dialogical approach towards knowledge generation Such an approach is essential in efforts aimed at enhancing the sustainable reconfiguration of university structures and functions whilst linking knowledge produced to diverse social economic and political facets of African societies in ways that promote and sustain competitiveness in a rapidly globalising world beset with technological advancements *Corrupted* Jonathan D Jansen, 2023-02 Through investigatory reports and

interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities He reveals the political economy at work and the intense competition for resources on campuses He also provides interventions for these fragile institutions Why do some universities seem to be in a constant state of turmoil and dysfunction Jonathan Jansen explores the root causes of chronic instability in a sample of South African universities Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources especially on campuses located in impoverished communities It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never ending run on the material such as money for infrastructure and symbolic namely graduation certificates for sale assets of these institutions Jansen argues that the problem won t be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly
