**Differential Diagnosis for the Dermatologist** Scott Jackson, Lee T. Nesbitt, 2008-05-07 This book originated as a small reference manual that I created to serve as an educational supplement for the dermatology residents at Louisiana State University Health Sciences Center Deeming the compiled information to be useful for all dermatologists I decided to expand the text and publish it Every major category of the patient evaluation from the chief complaint to the diagnosis is addressed with regard to the dermatological differential diagnosis The establishment of a precise differential diagnosis for a given cutaneous problem is the fundamental challenge that the dermatologist faces with every patient This unique exercise is very intellectual in a short period of time the clinician must select from a list of perhaps several hundred diseases a few possibilities that match the clinical presentation This is performed while also negotiating the patient interaction examining the patient and beginning to formulate a plan of action Proficiency in the formulation of a differential diagnosis that is brief and simultaneously thorough allows for consideration of all possibilities proper evaluation and hopefully rapid diagnosis We hope to provide the target readers dermatologists and dermatologists in training with some assistance in carrying out this frequently complicated task For the confrontation with an atypical presentation of a common disease or the classic presentation of an uncommon disease the reader will hopefully find this book very useful
