Differential Equations, Student Resource Manual Robert L. Borrelli, Courtney S. Coleman, 1997-11-26. The Authors' goal is to communicate an exciting new approach to Differential Equations through Modeling, Visualization, and Dynamical Systems. This new way of looking at ODEs blends the tried and true analytical methods with mathematical modeling applications to engineering and the sciences, and geometric visualization via numerical solvers. The resulting rich insight and highly motivated learning offers students a powerful, stimulating yet accessible experience that brings them to a deep understanding of ODEs.

Elementary Differential Equations William E. Boyce, Richard C. DiPrima, Douglas B. Meade, 2017-08-14. With Wiley's Enhanced E-Text, you get all the benefits of a downloadable, reflowable eBook with added resources to make your study time more effective, including Embedded, searchable equations, figures, tables, Math XML, Index with linked page numbers for easy reference, Redrawn full color figures to allow for easier identification.

Elementary Differential Equations 11th Edition is written from the viewpoint of the applied mathematician whose interest in differential equations may sometimes be quite theoretical, sometimes intensely practical, and often somewhere in between. The authors have sought to combine a sound and accurate but not abstract exposition of the elementary theory of differential equations with considerable material on methods of solution, analysis, and approximation that have proved useful in a wide variety of applications. While the general structure of the book remains unchanged, some notable changes have been made to improve the clarity and readability of basic material about differential equations and their applications. In addition to expanded explanations, the 11th edition includes new problems, updated figures, and examples to help motivate students. The program is primarily intended for undergraduate students of mathematics, science, or engineering who typically take a course on differential equations during their first or second year of study. The main prerequisite for engaging with the program is a working knowledge of calculus gained from a normal two or three semester course sequence or its equivalent. Some familiarity with matrices will also be helpful in the chapters on systems of differential equations.

Modeling Biology Manfred Dietrich Laubichler, Gerd B. Müller, 2007 Experts examine new modeling strategies for the interpretation of biological data and their integration into the conceptual framework of theoretical biology detailing approaches that focus on morphology development behavior or evolution Abstract and conceptual models have become an indispensable tool for analyzing the flood of highly detailed empirical data generated in recent years by advanced techniques in the biosciences Scientists are developing new modeling strategies for analyzing data integrating results into the conceptual framework of theoretical biology and formulating new hypotheses In Modeling Biology leading scholars investigate new modeling strategies in the domains of morphology development behavior and evolution The emphasis on models in the biological sciences has been accompanied by a new focus on conceptual issues and a more complex understanding of epistemological concepts Contributors to Modeling Biology discuss models and modeling strategies from the perspectives of philosophy history and applied mathematics Individual chapters discuss specific approaches to modeling in such domains as biological form development and behavior Finally the book addresses the modeling of these properties in the context of evolution with a particular emphasis on the emerging field of evolutionary developmental biology or evo devo Contributors Giorgio A Ascoli Chandrajit Bajaj James P Collins Luciano da Fontoura Costa Kerstin Dautenhahn Nigel R Franks Scott Gilbert Marta Ibañez Miguez Juan Carlos Izpisua Belmonte Alexander S Klyubin Thomas J Koehnle Manfred D Laubichler Sabina Leonelli James A R Marshall George R McGhee Jr Gerd B Müller Christopher L Nehaniv Karl J Niklas Lars Olsson Eirikur Palsson Daniel Polani Diego Rasskin Gutman Hans Jörg Rheinberger Alexei V Samsonovich Jeffrey C Schank Harry B M Uylings Jaap van Pelt Iain Werry
