#### **Pre-Lab Questions:**

1. Explain the digestion that occurs in the oral cavity.

In the oral cavity, digestion begins with the mechanical breakdown of food through chewing and mixing with saliva, which contains enzymes like amylase that start breaking down carbohydrates into simpler sugars. The process of mastication and saliva's enzymatic action prepares the food into a semi-liquid mixture, known as bolus, ready for swallowing and further digestion in the stomach.

2. What is the function of the liver in digestion?

The liver plays a vital role in digestion by producing bile, which aids in the breakdown and emulsification of fats, facilitating their absorption in the small intestine.

3. What role does the gall bladder play in digestion?

The gallbladder stores and concentrates bile produced by the liver, releasing it into the small intestine when needed to aid in the digestion and absorption of fats.

4. Why is the orientation of muscle of the stomach wall important? How does this contribute to its function?

The orientation of the muscle in the stomach wall, which includes longitudinal, circular, and oblique layers, is essential for its function as it allows for efficient mixing, churning, and propulsion of food during digestion, enabling better breakdown and mixing with digestive enzymes.

*Workbook and Lab Manual for Sonography - E-Book* Reva Arnez Curry, 2015-11-06 Curry and Tempkin's Workbook for Sonography Introduction to Normal Structure and Function 4th Edition is the essential reinforcement and review tool for visual information covered in the text. This Workbook supports and completes the text by providing an excellent introduction to sonography and preparing you to accurately identify sonographic pathology and abnormalities. Each chapter opens with review questions and features drawings from the text with parallel sonograms where appropriate that include leader lines to label structures. You fill in the labels to identify structures reinforcing visual and auditory learning from the text. You can also refer to the text if you are uncertain or need to review an area. Unlabeled line drawings and images from every chapter allow for immediate thorough review of material and let you refer to the text's diagrams and Workbook's appendix for answers. Review questions test you on information learned in the text. User friendly standardized chapter format means you know exactly where to go for review in each chapter. NEW Thorough coverage of the newest U.S. imaging techniques keeps you informed about the latest developments and prepares you to meet the challenges of the clinical environment. NEW Three brand new chapters give you the most up to date information on fetal echocardiography, laboratory values, and ergonomics. NEW 340 added content review questions provide you with extra practice on core content from Curry and Tempkin's textbook. NEW Updated sonograms present the best and latest images from state of the art equipment including 3D and 4D images.

insular thoughts are not only appreciated but flourishing I wanted to know why Pakistani elites have so much power and freedom while lower classes are profoundly oppressed Elites who barely pay taxes have been in power for generations while those that pay taxes suffer from sky high inflation The influential religious leaders mostly belong to the elite class while their followers are mostly lower class Ruling families and social classes mostly control appointed positions Do those in power not have a responsibility to speak on issues of social justice rather than limiting themselves in claiming that theirs is the only true form of Islam Why don t they work to end the disparity of quality education between classes in Pakistan Instead many elites run their own lucrative elite Islamic schools More importantly why do the ulama which literally means those who possess knowledge ilm particularly of Islam maintain a tight hierarchical system in the madrasa Islamic seminary community that rarely allows poor intelligent students to attain leadership positions Why are the ulama silent in the face of ruthless murder of and discrimination against Pakistani minorities Book Review Pakistan Educational Reforms is a major study of education in Pakistan and its national and madrasa curriculum that fosters national and religious sectarian divisions intolerance and conflicts Dr Amna Afreen documents the political socio economic and religious causes limited government funding widespread poverty and illiteracy and the poor training and performance of teachers that have produced a failed educational system at urban and rural government and religious schools madrasa and offers a series of potential solutions and reforms John L Esposito University Professor and Founding Director of The Alwaleed Center for Muslim Christian Understanding Georgetown University
