Nominal Duration: 1.5 hours

Learning Outcomes:

Upon completion of this topic, the student must be able to:

1. recognize and recall a moral experience;
2. detect a moral dilemma; and
3. give examples of the three levels of moral dilemmas.

Introduction

A dilemma is a situation in which a difficult choice has to be made between two or more alternatives, especially equally undesirable ones. It is a conflict in which you have to choose between two or more actions and have moral reasons for choosing each action.

- 1) An individual is presented with two or more actions, all of which the individual has the ability to perform.
- 2) There are moral reasons for the individual to choose each of the actions.
- 3) The individual cannot perform all of the actions and have to choose which action, or actions to perform when there are three or more choices.

Since there are moral reasons to choose each action, and the individual cannot choose them all, it follows that no matter what choice the individual makes, he or she will be failing to follow his or her morals. In other words, someone or something will suffer no matter what choice he or she makes.

Three Levels of Moral Dilemmas

1. Individual Moral Dilemma

This is a moral dilemma that involves the individual on a personal level. Factors such as personal health issues, family issues, personal financial issues, peer pressures and socio-economic issues among many others may lead to ethical tensions within the person himself. Example: A child in the family is in a dilemma whether to donate his kidney for the sake of his sister or not considering that there may be some health complications that may arise in the future.

2. Organizational Moral Dilemma

This is a moral conflict that occurs in the organization or institution where individuals within the organization will face the dilemma of personal choices against the working ethics of the organization or institution. Example: a network administrator who found out about the infidelity of his best friend's wife through her emails is in a dilemma whether to inform his best friend about it or not considering the policy of the company on personal emails. Other examples may be found in businesses, scholarship policies, medical field, and employment discriminations among others.

3. Systemic Moral Dilemma

This is a moral dilemma that occurs at a macro level. Factors such as political pressures, economic conditions, societal attitudes, government regulations and policies may bring about a moral dilemma. These factors affect operations and relationships which drives an impact to the people, the market, the workplace and others on a local, national and international level. Examples are death penalty, Contractualization, War on Drugs Program of the Government, RH Law....

Trends in Private Investment in Developing Countries Lawrence Bouton, Mariusz A. Sumlinski, 1996 This short paper in its eighth edition provides private and public investment data through 1995 Although the growing empirical literature on privatization has almost invariably found that the transfer of assets from public to private hands yields both efficiency and welfare gains there has been a surprising lack of research on the macroeconomic consequences of privatization This report addresses that issue briefly exploring the impact of privatization on private fixed investment As a starting point the dimensions of the privatization revolution are summarized with special emphasis on the contribution made by foreign investors Data on investment commitments stemming from privatization are also presented The final section offers some econometric insights into the importance of privatization as a determinant of private investment in developing countries The report concludes that privatization of state owned enterprises is likely to have a multiplier effect on private investment and is therefore an important ingredient of governments efforts to improve the business climate and to step up the pace of economic development Appendix 1 discusses the methods and sources used Appendix 2 presents tables with investment figures in terms of five ratios Appendix 3 graphs the data by region and Appendix 4 discusses the econometric results
