Heaven and Earth Maxime A. Collin, 2021-06-07 Our understanding of modern power politics usually relies on simple linear narratives which tend to obfuscate complex systems Sociological and historical connections in particular are eschewed in favor of national histories and short term analysis Yet actors tend to found their intents and actions on complex kinetics rooted in their core identities To study the way identity is built and expressed opens the way for a more comprehensive analysis of actors on the international stage through a recontextualization of social competition and the mechanisms of fear hate and sacrifice These kinetics also shine a light on the new contemporary facets of power which no longer exists as a unilateral flux but rather as a combination of action expression and shaping of the superstructure The example of the East

RMAs Hostile Business and the Sovereign State Michael J. Strauss,2018-12-14 This book describes and assesses an emerging threat to states territorial control and sovereignty the hostile control of companies that carry out privatized aspects of sovereign authority The threat arises from the massive worldwide shift of state activities to the private sector since the late 1970s in conjunction with two other modern trends the globalization of business and the liberalization of international capital flows The work introduces three new concepts firstly the rise of companies that handle privatized activities and the associated advent of post government companies that make such activities their core business Control of them may reside with individual investors other companies or investment funds or it may reside with other states through state owned enterprises or sovereign wealth funds Secondly imperfect privatizations when a state privatizes an activity to another state s public sector The book identifies cases where this is happening It also elaborates on how ownership and influence of companies that perform privatized functions may not be transparent and can pass to inherently hostile actors including criminal or terrorist organizations Thirdly belligerent companies whose conduct is hostile to those of states where they are active The book concludes by assessing the adequacy of existing legal and regulatory regimes and how relevant norms may evolve

State Policing in Sub-Saharan Africa Fatoumata Sira Diallo,2019-12-20 The key argument of this book is that state policing plays a vital role in the realm of security sector governance but that African police have several failings that are direct outcomes of their historical development they are often violent brutal corrupt and politicised As institutions Africa s national police forces still tend to resemble those established by colonial powers in their structure and conduct and are typically mistrusted by the very people for whom they are meant to ensure security and safety

military operations across the spectrum of conflict from peace to crisis to war which a new strategic deterrence demands The broad utility of effects based operations grows from the fact that they are focused on actions and their links to behavior on stimulus and response rather than on targets and damage infliction They are applicable not only to traditional warfare but also to military operations short of combat Effects based operations are coordinated sets of actions directed at shaping the behavior of friends foes and neutrals in peace crisis and war In brief network centric operations are indeed a means to an end and effects based operations are that end
