

Figure 8-3 shows an anterior view of the female reproductive system. Each **ovary** [1] is held in place on either side of the uterus by a **utero-ovarian ligament** [2].

Within each ovary are thousands of small sacs—the **ovarian follicles** [3]. Each follicle contains an **ovum** [4]. During **ovulation**, an ovum matures; its follicle ruptures through the surface and releases the ovum from the ovary. A ruptured follicle fills with a yellow, fat-like material. It is then called the **corpus luteum** [5], meaning yellow body. The corpus luteum secretes hormones (both estrogen and progesterone) that maintain the very first stages of pregnancy.

A **fallopian tube** [6] is about 5½ inches long and lies near each ovary. Collectively, the fallopian tubes, ovaries, and supporting ligaments are the **adnexae** (accessory structures) of the uterus. The finger-like ends of the fallopian tube are the **fimbriae** [7]. They catch the egg after its release from the ovary. **Cilia** (small hairs) line the fallopian tube and, through their motion, sweep the ovum along. It usually takes the ovum about 2 to 3 days to pass through the fallopian tube.

If sperm cells are present in the fallopian tube, fertilization may occur (Figure 8-4). If sperm cells are not present, the ovum remains unfertilized and eventually disintegrates.

The fallopian tubes, one on each side, lead into the **uterus** [8], a pear-shaped organ with muscular walls and a mucous membrane lining filled with a rich supply of blood vessels. The rounded upper portion of the uterus is the **fundus**, and the larger, central section is the **corpus** (body of the organ). The inner layer, a specialized epithelial mucosa of the uterus is the **endometrium** [9]; the middle, muscular layer of the uterine wall is the **myometrium** [10]; and the outer, membranous tissue layer is the **uterine serosa** [11], a lining that produces a watery, serum-like secretion. The outermost layer of an organ in the abdomen or thorax is known as a serosa.

The narrow, lowermost portion of the uterus is the **cervix** [12] (Latin *cervix* means neck). The cervical opening leads into a 3-inch-long muscular, mucosa-lined canal called the
