

Chapter 25: The Age of Western Imperialism

- **New Imperialism:** extension in the late nineteenth and early twentieth centuries of Western political and economic dominance to Asia, the Middle East, and Africa
- **Imperialism:** the extension of a nation's authority over other nations or areas through conquest or political economic hegemony

25.1 The Close of the Age of Early Modern Colonization

How did early modern colonization differ from nineteenth century Western imperialism?

- Early modern European expansion from late 15th to 18th century
 - Conquest, settlement, and exploitation of American continent by Spanish, Portuguese, French, and English
 - Trading posts in Africa and Asia; mercantilist economy
 - Triangle trade and Atlantic economy
- Colonial rivalry & British dominance in America until American Revolution
- **Monroe Doctrine (1823):** Policy of the United States that closed the Americas to European colonialism
- Slavery absent in 19th century European empires
- Roman Catholicism dominant in transatlantic empires; Protestant settlers in colonies

25.2 The Age of British Imperial Dominance

How did Britain use its economic might to extend its influence around the world?

- **Imperialism of Free Trade:** advance of European economic and political interests in 19th century by demanding non-European nations allow European nations, mainly Great Britain, to introduce their manufactured goods freely into all nations, or introduce other goods, such as opium to China, that allowed those nations to establish economic influence and determine terms of trade

25.2.1 The Imperialism of Free Trade

- Mercantile economic doctrines
 - Measured wealth in gold and silver and said trade was finite
 - If one nation's trade increased, another had to decrease
- Adam Smith said empires would prosper by abandoning imperial systems in favor of free trade and by fostering the exchange of goods with minimal government regulation
 - Free traders said trade was infinite and this would ensure low prices
- Britain became "workshop of the world" and produced more manufactured goods than population could consume
- Free trade lead to warfare → opium trade to China
 - Europeans wanted Chinese goods like silk, tea, and porcelain
- **Opium Wars:** series of wars waged by British to impose free trade on opium in China

Jackson J. Spielvogel,2001-06 Propaganda and Power in the Age of Globalization Simon Sherratt,2024-08-15 Following victory in World War II the US and Western Europe claimed to be the champions of the political ideals of democracy and freedom along with the economic ideal of free market capitalism Two decades into the twenty first century these once noble ideals have been reduced to little more than myths myths that bear scant resemblance to the realities of the powerful political and economic forces that dominate the Western world This book examines the dangerous prospects we face as the societies built upon these myths begin to fragment and crumble In an open and accessible style this book argues that much of the confusion that currently plagues the West is due to the fact that its social economic and political systems are saturated by a little understood and rarely acknowledged system of propaganda This book seeks to clear away this propagandistic facade in order to reveal where power really lies in Western societies examining how this power functions and how it has corrupted the ideals of democracy freedom and capitalism to suit its own ends This volume will be of value to those interested in modern history and social and political history Coal and Empire Peter A. Shulman,2015-07-01 The fascinating history of how coal based energy became entangled with American security Since the early twentieth century Americans have associated oil with national security From World War I to American involvement in the Middle East this connection has seemed a self evident truth But as Peter A Shulman argues Americans had to learn to think about the geopolitics of energy in terms of security and they did so beginning in the nineteenth century the age of coal Coal and Empire insightfully weaves together pivotal moments in the history of science and technology by linking coal and steam to the realms of foreign relations navy logistics and American politics Long before oil coal allowed Americans to rethink the place of the United States in the world Shulman explores how the development of coal fired oceangoing steam power in the 1840s created new questions opportunities and problems for U S foreign relations and naval strategy The search for coal for example helped take Commodore Matthew Perry to Japan in the 1850s It facilitated Abraham Lincoln s pursuit of black colonization in 1860s Panama After the Civil War it led Americans to debate whether a need for coaling stations required the

construction of a global empire Until 1898 however Americans preferred to answer the questions posed by coal with new technologies rather than new territories Afterward the establishment of America s string of island outposts created an entirely different demand for coal to secure the country s new colonial borders a process that paved the way for how Americans incorporated oil into their strategic thought By exploring how the security dimensions of energy were not intrinsically linked to a particular source of power but rather to political choices about America s role in the world Shulman ultimately suggests that contemporary global struggles over energy will never disappear even if oil is someday displaced by alternative sources of power

Reference Studies in Mediaeval History James Westfall Thompson,1907 Shadows of the Future Patrick Parrinder,1995-09-01 H G Wells the inventor of the concept of the time machine and the phrase the Shape of Things to Come described his life s work as one of critical anticipation Shadows of the Future identifies the attempt to imagine possible futures as the unifying principle behind Wells s diverse and sometimes wayward literary career The book unravels the complex layers of meaning in The Time Machine and shows how throughout his life he sought to exploit the potential of literary and cultural prophecy in new ways Described by John Middleton Murry as the last prophet of bourgeois Europe he was also its first futurologist In Shadows of the Future Wells s assumption of the prophet s role is related to his championship of the modern scientific outlook and to the theory and practice of science fiction and utopian literature Parrinder explores the connections between novelty and repetition between imagining the future and imagining the past and between prophecy and parody as literary modes Wells s science fiction is reexamined both as a projection of the cosmology implicit in the writings of Darwin and Huxley and as a new variation on the Romantic and Enlightenment themes of such earlier authors as Blake Gibbon and Mary Shelley Later chapters relate Wells s fiction to his nonfiction and look at the uneasy relationship of his utopianism to literary prophecy and at the paradoxes inherent in the militant internationalism of

the prophet at large Finally Wells s influence is traced in a study of the antiutopian fictions of Zamyatin and Orwell and in a broad account of the connections between science fiction and the scientific outlook down to our own time
