Bowman,2021-08-25 It s axiomatic to state that people fear what they do not understand and this is especially true when it comes to technology However despite their prevalence computers remain shrouded in mystery and many users feel apprehensive when interacting with them Smartphones have only exacerbated the issue Indeed most users of these devices leverage only a small fraction of the power they hold in their hands How Things Work The Computer Science Edition is a roadmap for readers who want to overcome their technophobia and harness the full power of everyday technology Beginning with the basics the book demystifies the mysterious world of computer science explains its fundamental concepts in simple terms and answers the questions many users feel too intimidated to ask By the end of the book readers will understand how computers and smart devices function and more important how they can make these devices work for them To complete the picture the book also introduces readers to the darker side of modern technology security and privacy concerns identity theft and threats from the Dark Web **Dr. Dobb's Journal** ,2002 **Stuck in the Shallow End** Jane Margolis,2008-08-15 The number of African Americans

and Latino as receiving undergraduate and advanced degrees in computer science is disproportionately low according to recent surveys And relatively few African American and Latino a high school students receive the kind of institutional encouragement educational opportunities and preparation needed for them to choose computer science as a field of study and profession In Stuck in the Shallow End Jane Margolis looks at the daily experiences of students and teachers in three Los Angeles public high schools an overcrowded urban high school a math and science magnet school and a well funded school in an affluent neighborhood She finds an insidious virtual segregation that maintains inequality Two of the three schools studied offer only low level how to keyboarding cutting and pasting introductory computing classes The third and wealthiest school offers advanced courses but very few students of color enroll in them The race gap in computer science Margolis finds is one example of the way students of color are denied a wide range of occupational and educational futures Margolis traces the interplay of school structures such factors as course offerings and student to counselor ratios and belief systems including teachers assumptions about their students and students assumptions about themselves Stuck in the Shallow End is a story of how inequality is reproduced in America and how students and teachers given the necessary tools can change the system
