, 1985 *The Conceptual Approach to Rock Music* Gene Grier, 1974 **Race, Rock, and Elvis** Michael T. Bertrand, 2000 In *Race Rock and Elvis* Michael T Bertrand contends that popular music specifically Elvis Presley's brand of rock n roll helped revise racial attitudes after World War II Observing that youthful fans of rhythm and blues rock n roll and other black inspired music seemed more inclined than their segregationist elders to ignore the color line Bertrand links popular music with a more general relaxation led by white youths of the historical denigration of blacks in the South The tradition of southern racism successfully communicated to previous generations failed for the first time when confronted with the demand for rock n roll by a new national commercialized youth culture In a narrative peppered with the colorful observations of ordinary southerners Bertrand argues that appreciating black music made possible a new recognition of blacks as fellow human beings Bertrand documents black enthusiasm for Elvis Presley and cites the racially mixed audiences that flocked to the new music at a time when adults expected separate performances for black audiences and white He describes the critical role of radio and recordings in blurring the color line and notes that these media made black culture available to appreciative whites on an unprecedented scale He also shows how music was used to define and express the values of a southern working class youth culture in transition as young whites many of them trying to orient themselves in an unfamiliar urban setting embraced black music and culture as a means of identifying themselves By adding rock n roll to the mix of factors that fed into civil rights advances in the South *Race Rock and Elvis* shows how the music with its rituals and vehicles symbolized the

of Disease Lawrie Reznick,2022-05-24 Originally published in 1987 this book is about the classification of bodily conditions
into diseases It provides a full account of the concept of disease examining the issue of whether disease status is something
we discover or invent and the issue of whether disease attributions involve implicit value judgements It investigates whether
bodily conditions fall into natural kinds and whether these debates can be settled by discovering whether there are any
natural boundaries dividing conditions into diseases and non diseases It considers whether the notion of disease is an
evaluative notion or whether judgements about disease status are purely descriptive The issue of whether other cultures with
