Chapter 7 Energy Momentum and Energy

Show your work and include units!

$t = 0 \text{ s}$
momentum = $0 \text{ kg}(\text{m/s})$

$t = 1 \text{ s}$
momentum = $100 \text{ kg}(\text{m/s})$

$t = 2 \text{ s}$
momentum = $200 \text{ kg}(\text{m/s})$

$t = 3 \text{ s}$
momentum = $200 \text{ kg}(\text{m/s})$

$t = 5 \text{ s}$
momentum = $0 \text{ kg}(\text{m/s})$

Bronco Brown wants to put $Ft = \Delta mv$ to the test and try bungee jumping. Bronco leaps from a high cliff and experiences 3 s of free fall. Then the bungee cord begins to stretch, reducing his speed to zero in 2 s. Fortunately, the cord stretches to its maximum length just short of the ground below.

Fill in the blanks:

Bronco's mass is 100 kg.

Acceleration of free fall is 10 m/s^2 .

Express values in SI units (distance in m, velocity in m/s , momentum in $\text{kg} \cdot \text{m/s}$, impulse in $\text{N} \cdot \text{s}$, and deceleration in m/s^2).

$d = 1/2 at^2$

The 3-s free-fall distance of Bronco just before the bungee cord begins to stretch = 15 m

Δmv during the 0 to 3-s interval of free fall = $200 \text{ kg}(\text{m/s})$

Δmv during the 3 to 5-s of slowing down = $-200 \text{ kg}(\text{m/s})$

Impulse during the 3 to 5-s of slowing down = $-200 \text{ N} \cdot \text{s}$

Average force exerted by the cord during the 3 to 5-s interval of slowing down = -100 N

How about work and energy? How much KE does Bronco have 3 s after he first jumps? $11,250 \text{ J}$

How much does gravitational PE decrease during this 3 s? $-15,000 \text{ J}$

$1/2(100 \text{ kg})(15 \text{ m/s}^2)$
 $50 \text{ kg}(250 \text{ m/s}^2)$

What two kinds of PE are changing during the 3 to 5-s slowing-down interval?

Gravitational Potential Energy

Motor Learning and Performance 6th Edition with Web Study Guide-Loose-Leaf Edition Richard A. Schmidt, Timothy D. Lee, 2019-09-18 Motor Learning and Performance Sixth Edition constructs a conceptual model of factors that influence motor performance outlines how motor skills are acquired and retained with practice and shows how to apply those concepts to a variety of real world settings

Conceptual Physics, 1977 Waves And Rays In Seismology: Answers To Unasked Questions (Second Edition) Michael A Slawinski, 2018-05-04 In summary Professor Slawinski has written an engaging volume covering an unfamiliar topic in a highly accessible fashion Non specialists will gain a significant appreciation of the unique complexities associated with seismology Contemporary Physics The author dedicates this book to readers who are concerned with finding out the status of concepts statements and hypotheses and with clarifying and rearranging them in a logical order It is thus not intended to teach tools and techniques of the trade but to discuss the foundations on which seismology and in a larger sense the theory of wave propagation in solids is built A key question is why and to what degree can a theory developed for an elastic continuum be used to investigate the propagation of waves in the Earth which is neither a continuum nor fully elastic But the scrutiny of the foundations goes much deeper material symmetry effective tensors equivalent media the influence or rather the lack thereof of gravitational and thermal effects and the rotation of the Earth are discussed ab initio The variational principles of Fermat and Hamilton and their consequences for the propagation of elastic waves causality Noether's theorem and its consequences on conservation of energy and conservation of linear momentum are but a few topics that are investigated in the process to establish seismology as a science and to investigate its relation to subjects like realism and empiricism in natural sciences to the nature of explanations and predictions and to experimental verification and refutation In the second edition new sections figures examples exercises and remarks are added Most importantly however four new appendices of about one hundred pages are included which can serve as a self contained continuum mechanics course on finite elasticity Also they broaden the scope of elasticity theory commonly considered in seismology

Waves And

Rays In Seismology: Answers To Unasked Questions (Third Edition) Michael A Slawinski, 2020-11-20 This is a book on seismology dealing with advanced aspects of wave propagation in complex media It can also be viewed as a book on mathematical modelling wherein the accuracy of describing seismic phenomena exemplifies the modelling itself The book gives an insight into the power of abstractness by applying the same mathematical methods and strategies to solve a variety of different physical problems This book covers a broad range of topics in an advanced yet accessible manner Each chapter is accompanied by a number of solved exercises which render the book convenient for a lecturer and facilitate its use for an independent study The details of mathematical methods are discussed in the appendices which form a substantial portion of the book

A Powerful Particulars View of Causation R.D. Ingthorsson, 2021-01-26 This book critically examines the recent discussions of powers and powers based accounts of causation The author then develops an original view of powers based causation that aims to be compatible with the theories and findings of natural science Recently there has been a dramatic revival of realist approaches to properties and causation which focus on the relevance of Aristotelian metaphysics and the notion of powers for a scientifically informed view of causation In this book R D Ingthorsson argues that one central feature of powers based accounts of causation is arguably incompatible with what is today recognised as fact in the sciences notably that all interactions are thoroughly reciprocal Ingthorsson s powerful particulars view of causation accommodates for the reciprocity of interactions It also draws out the consequences of that view for issue of causal necessity and offers a way to understand the constitution and persistence of compound objects as causal phenomena Furthermore Ingthorsson argues that compound entities so understood are just as much processes as they are substances A Powerful Particulars View of Causation will be of great interest to scholars and advanced students working in metaphysics philosophy of science and neo Aristotelian philosophy while also being accessible for a general audience The Open Access version of this book available at <http://www.taylorfrancis.com/books/9781003094241> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Particles, Fields, Space-Time Martin Pohl, 2025-06-27 Particles Fields Space Time From Thomson s Electron to Higgs Boson explores the concepts ideas and experimental results that brought us from the discovery of the first elementary particle in the end of the 19th century to the completion of the Standard Model of particle physics in the early 21st century The book concentrates on disruptive events and unexpected results that fundamentally changed our view of particles and how they move through space time It separates the mathematical and technical details from the narrative into focus boxes so that it remains accessible to non scientists yet interesting for those with a scientific background who wish to further their understanding The text presents and explains experiments and their results wherever appropriate This book is of interest to a general audience but also to students

studying particle physics physics teachers at all levels and scientists with a recreational curiosity towards the subject For this second edition the complete text has been thoroughly revised A description of plans for new accelerator facilities has been added as well as new results on cosmic ray physics dark matter and dark energy The usage of natural units has been abandoned in favour of SI units throughout the text Key Features Short comprehensive overview concentrating on major breakthroughs disruptive ideas and unexpected results Accessible to all interested in subatomic physics with little prior knowledge required Contains the latest developments in this exciting field [Resources in Education](#) ,1971
