

Setting up Your CorelDRAW Workspace

A workspace is a configuration of settings that specifies how the various command bars, commands, and buttons are arranged when you open the application. You can create, choose, and delete workspaces. You can also reset the current workspace to the default settings. This lets you undo changes you make to a workspace.

You can also export and import workspaces to and from other computers that use the same application. For example, you can customize a workspace and share it with a group of users.

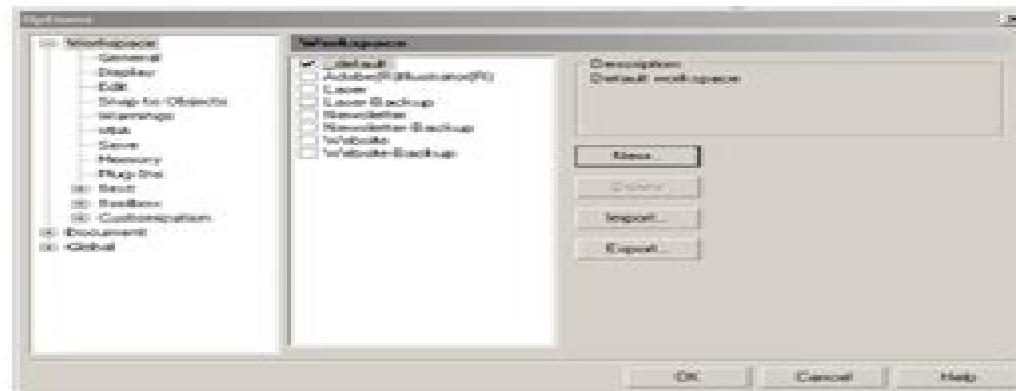

Here are some examples of workspaces I use:

- Newsletter
- Website
- Laser

Other custom workspaces might include those for sublimation, vinyl cutting and more.

Switching Between Workspaces

To get to workspaces, go to **TOOLS | OPTIONS | WORKSPACE**. The Options dialog is shown to the below:

Newer versions of CorelDRAW will automatically change your current workspace immediately after you select the workspace. In CorelDRAW 9, you must close your current job, and start a new job after you select a new or existing workspace for the workspace change to be visible.
