

making it successful Pamphlet covers

The front panel of a pamphlet is often our first point of contact. It will need to be removed from the rest of the pack, to attract attention both to the top third of the front cover. Photos can attract attention (but not a lot of the way) with the main subject dominating the pamphlet in front, will not cut it). Perhaps an a subtle heading at the top of the pamphlet. Some designers have made pamphlets out of the cut shapes. The cut-out design is the rest of the lighting. Some have nothing on the top of the other pamphlet in the rest. Sometimes too a pamphlet is a brochure. Any or all of the following will continue to use the front cover. To make the back cover panel attached too, but it will come of the way or just repeat the front information, perhaps adding the usual address, phone numbers, website (URL, email, fax and other contact information. In this way, whatever way someone makes the pamphlet, one of the message gets through. Some European governments do it with the front.

Advertising also helps define publishing costs. The magazine publisher may not need to make a profit out of their custom magazine itself, but the publisher might want its production to be as close to cost-neutral as possible. Designers must keep this in mind and work within the publisher's policy.

The editor will probably commission a few feature articles for each issue and have a few regular columns in addition to the expected new product round-up, news pages and product reviews. You can use inviting devices such as games pages, free giveaways or exclusive offers, and cartoon strips. And market penetration tracking devices such as competitions.

The design of a custom magazine should fit the corporate identity. It will have, in most cases, a separate but related identity. It does not have to strictly follow corporate style manuals, grid systems or even typelists. However, somewhere up-front - either on the cover or the content page - the organisation needs to be identified using its logo and colours.

It is in the corporate identity's interest that the logo and masthead work in close proximity. This doesn't mean the logo must be a component of the masthead. Although this is often true. It is close more in proximity than in content magazine.

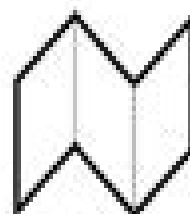

Sometimes this corporate awareness is achieved simply by having a horizontal element of the company's own advertising scattered through the magazine. This helps to maintain the image of the magazine's editorial freedom.

Pamphlets and brochures

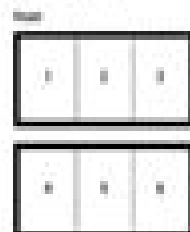

A pamphlet is a small tract or leaflet in the traditional form of a 2-fold, 4-panel pamphlet of 1/4 A4 (approximately), generally referred to as 1/4 A4 folded to D4. D4 is the size of the envelope is the size of the envelope.

The 1/4 A4 pamphlet is so constructed that if a client asks for a pamphlet and gets another size, a designer has a lot of explaining to do. And reasonably so, since most pamphlet racks and counter boxes are now made for the size and D4 envelopes make its mailing cost-effective.

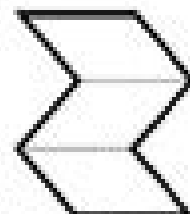

A flyer is a single sheet of paper printed on either 1 or both sides.

A brochure is usually more like a booklet, but it can be a larger format folded sheet of paper. Some papers fold down to become multipage documents.

The standard requirements for producing a pamphlet or brochure are a front cover that is visually interesting and distinctive with a panel or page design that continues the style established by the cover.

There are a number of standard methods of folding them:

- Concertina or accordion or zig-zag or Z fold, 1 or more panels, where the panels fold forward and backward in sequence.
- Gate fold 1 or 2 panels, where the panels fold into the centre from both sides.
- Roll fold, 2 or more panels, where they roll in on themselves.

Of course, custom folds can be created or angled. The edges and panels of the pamphlet can also be die-cut. In pamphlet can be quite diverse in form.

A 4-panel, 1/4 A4 pamphlet can be either concertina or gate folded. Both give the panels a different order. The panels need to be considered in relation to each other to ensure they remain interesting while reading the content.

types of material Materials to consider for the panel It is a gate-folded pamphlet

When you open a gate-folded pamphlet, panel 1 is on the left with panel 2 on the right. Opening panel 2 reveals panels 3 and 4. Its panel 1 has been used out of sequence and higher is priority than for number 2. If it is used, it is often used for material that stands alone, such as:

- guarantee
- testimonials
- order or booking form
- quote or testimonials
- personal invitation (request)
- summary of features
- special offer
