Digital Guide Information McLuhan Millennium:

Digital McLuhan Paul Levinson, 2003-09-02 Marshall McLuhan died on the last day of 1980 on the doorstep of the personal computer revolution Yet McLuhan's ideas anticipated a world of media in motion and its impact on our lives on the dawn of the new millennium Paul Levinson examines why McLuhan's theories about media are more important to us today than when they were first written and why the Wired generation is now turning to McLuhan's work to understand the global village in the digital age *The Toronto School of Communication Theory* Rita Watson, Menahem Blondheim, 2008-02-23 While never formally recognized as a school of thought in its time the work of a number of University of Toronto scholars over several decades most notably Harold Adams Innis and Marshall McLuhan formulated a number of original attempts to conceptualize communication as a phenomenon and launched radical and innovative conjectures about its consequences This landmark collection of essays reassesses the existence and re-evaluates the contribution of the so-called Toronto School of Communication While the theories of Innis and McLuhan are notoriously resistant to neat encapsulation some general themes have emerged in scholarly attempts to situate them within the discipline of communications studies that they helped to define Three such themes focus on the effects and consequences of communications emphasis on communications as a process rather than as structure and a sharp focus on the technology of communication or the medium are the most fundamental in characterizing the unique perspective of the Toronto School This collection not only represents a crucial step in defining the Toronto School it also provides close analysis of the ideas of its individual members **An Introduction to Global Studies** Patricia J. desk In contrast the cellphone lets us walk through the world fully connected Cellphone explores the history of mobility in media from books to cameras to transistor radios to laptops and examines the unique impact of a device that sits in a pocket or palm and lets us converse by voice or text The restricting and liberating edge of accessibility transforms restaurants public transport automobiles romance literacy parent child relationships war and indeed all walks of life trivial and profound Like an organic cell that moves evolves combines with other cells and generates the cellphone has become a complex sparkplug of human life
