What To Consider When Purchasing

## Ask Yourself

- What do you intend to use your camera for?
- Is it budget, work or purely for fun?
- Are there specific features you need?
- What is your budget?

## Megapixels

Don't get so hung up on having a camera with the most megapixels. Depending on the type of image you're capturing, having too many pixels can actually affect the quality of the snap.

## Megapixel Calculator

## Zoom

### Optical vs Digital

An optical zoom magnifies the actual image, whereas digital zoom crops the image and then enlarges it. Digital zooms are not as good as optical zooms.

### What effect does zoom have?

The further you zoom in digitally, the more blurry and pixelated the image becomes. It's recommended that you always go for the largest optical zoom that you can afford within your budget.

## LCD Display

### LCD Explained

LCD is the display technology used to create the screens embedded in the back of nearly all digital cameras.

LCD screen sharpness depends, in part, on the number of pixels. The number of pixels and this number should be listed in the camera's spec.

LCDs also appear in most digital photo frames, which display the digital photos.

## Card Compatibility

It's important to establish what types of memory cards your camera will fit before making a purchase.

## Functions

### Which functions are most desirable?

While shopping around for a camera, bear in mind the functions you will like to have. Here are a list of functions you should look out for:

## Image Stabilisation Auto Settings
