Faulconbridge,Allison Hui,2017-10-02 This agenda setting collection critically reflects upon a decade of contributions to the
social scientific mobilities turn in order to propose new trajectories for the future of this interdisciplinary research field The
chapters are all exemplars of how the past decade of research has opened up new insights into the place of mobilities in
societies They also highlight how attempts to look forward towards new conversations understandings and interventions in a
mobile world will emerge from the transformations invoked by this field of research Authors foreground issues of power
interdisciplinarity transformative technologies fragmented discourses and changing social processes whilst addressing
automobility aeromobility tourism communications technologies urban infrastructures migration and emergencies As a whole
the collection raises important questions about not only how understandings of mobilities are changing but also how the field
of mobilities research is itself on the move The evocative empirical cases and provocative arguments in this book thus
highlight the necessity of new concepts conversations methods empirical studies and interventions to address
transformations in both the complex mobilities of social worlds and what is examined or taken for granted in mobilities
research itself This book was originally published as a special issue of *Mobilities* *Catalog of Copyright Entries. Part 1. [B]*
