

CHILD STUDY PAPER

Introduction

The Child I observed is X and a male. He is from a family of 3 and is the first born in their family. Since I am not supposing the real name of the child, I have decided to name the child X. The family of X is not that stable and they struggle to survive. The parents do not have permanent jobs and works on a daily pay at the local company in a nearby town. X always looks after her siblings when the parents are away. X is five years old and is white in complexion with a curly hair. He is very polite and talks fluently. What amazed me with the young boy is the level of his courage when speaking his ideas (Datler et al., 2018). He is a biological child of his parents. The family members of this child are supportive and loving thus there is a good connection amongst the family members. Parents also provide security to the family which can be considered as a sense of belonging.

The parents of this child makes them feel important and valued within the family and this has created respect and good self-esteem within the family. Based on how the child was communicating, there is a sense that open communication is practiced within this family. The family context of X has enhanced his understanding of development and this has helped in pointing opportunities for change in his live. During my observation, I engaged the child in a one-on-one discussion. I was very keen while talking to the child. I used to do my observation during the evening hours from 3pm-5pm when he was relaxed and willing to have a conversation with me. I used to do my observation during the weekends after obtaining permission from his parents (Fagan, 2018). I observed the child by starting with a specific focus which helped me
