The QR code will take you to a video about this animal.

Frogs are a fascinating and important part of our ecosystem. They vary in size, with some being less than an inch long while others reach up to 15 inches long. Frogs have colorful, slimy, or smooth skin, big eyes, and long legs. Some can weigh less than an ounce, and others can weigh up to 15 pounds. Frogs have excellent vision, which allows them to see at night and from all sides.

Most frogs live in freshwater habitats like ponds, swamps, and rivers. They are found on every continent except Antarctica. As carnivores, they eat insects, snails, spiders, fish, and small rodents. These amphibians use their sticky tongues to catch food and often swallow it whole! Snakes, birds, and larger frogs hunt them. Frogs are known to camouflage or blend into their surroundings to escape predators.

Frogs go through a change called metamorphosis. They grow from a tadpole with gills and a tail to an adult frog with lungs and legs. Some frogs shed their skin weekly and will eat it afterward! Frogs live in groups called an "army." They are excellent jumpers and swimmers. They also have unique calls for communication that you can hear miles away.

*Child-study*, 1916      *Play Stories* Katelyn Clark, 2024-12-24 Inform your teaching using your own play history Play Stories invites early childhood educators to reflect deeply on their own childhood experiences and adult play and build their understanding of how their own identities shape their perspectives on children's play Katelyn Clark's model for uncovering and telling play stories is revealed through four educators' personal play narratives: the Puzzler, the Character, the Explorer, and the Maker Writing the stories of their own play provides a new platform for educators to understand their play pedagogy from a more holistic perspective and to identify where they really playfully shine in their classrooms thus becoming more invested in the play of their students      *Children's Stories* Santosh Choudhury, 2016-02-04 I wrote these stories as the ideas came to mind and children liked those That's how I got the encouragement One college grad told me that some stories may be used in movies he studies moviemaking Like any writer if the children enjoy the stories I will consider my efforts successful      *Handbook of Early Childhood Literacy* Nigel Hall, Joanne Larson, Jackie Marsh, 2003-10-18 This volume examines early literacy research on a global scale and puts social, cultural, and historical analyses in the front seat without losing sight of individual and family level matters in the process It is comprehensive, ground breaking, and provocative and should help literacy researchers to think differently about the field Marjorie Faulstich Orellana, School of Education and Social Policy, Northwestern University No other publication that I am aware of brings together views from such diverse disciplines contributing to a comprehensive statement about early childhood literacy The Handbook not only reviews the current field of situated literacy but presents some important and exciting new research It is a significant resource that promises to become a landmark text Eve Bearne, University of Cambridge Faculty of Education, U.K. This handbook brings together an astonishing array of writers who explore contemporary political, cultural, and cognitive understandings of early childhood literacy Literacy and literacy acquisition are broadly defined here to encompass not just traditional notions of reading and writing but multimodalities, multiliteracies, and critical literacies It is rich and comprehensive, an invaluable resource for scholars, educators, and students of early childhood literacy Elsa Auerbach, Professor of English, University of Massachusetts Boston This book is unique in its broad consideration of topics and its global focus I particularly appreciate how the editors have situated current research in an historical context They have also included development issues, pedagogy, research, and the newest areas of interest: critical literacy and popular culture Diane Barone, University of Nevada, Reno In recent years there has been a virtual revolution in early childhood studies with a mass of books and papers seeking to re-examine and reposition childhood At the same time, an equally significant area has developed within literacy studies reflecting a growing interest in the nature of literacy as a socially situated phenomenon There is increased interest in literacy as a multimodal concept in which symbolic meaning is a central concept rather than more conventional and narrower notions of literacy The Handbook of Early Childhood Literacy is central in providing access to all these different perspectives The

Handbook offers a way through the vast diversity of publications on early childhood literacy by providing comprehensive and up to date reviews of research and thinking in early childhood literacy The arrangement of chapters reflects a contemporary perspective on research into early childhood literacy Major sections include the global world of early childhood literacy childhood literacy and family community and culture the development of literacy in early childhood pedagogy and early childhood literacy and researching early childhood literacy Contributions by leading authorities focus on literacy as a socially situated and global experience one that is evolving in relation to changes in contemporary culture and technological innovation

Kids learn about new and interesting facts so that a combination of both the curious and the new materials and facts together with the visual aspect of the pictures Children are entertained with the coolness factor of the discovery book plus they learn some new and a little bit harder to retain facts simultaneously with the cool stuff and this is how the child is going to retain all of the information The discovery books work in synchronization with the brain and not against the brain like some dull textbooks try to teach things It is a fact that kids just love these discovery picture books about weird animals and weird stuff that the animals are doing because they love the coolness and grooviness factor of the books Parents are super satisfied because their children show interest for things on a higher level of interest as usual The discovery concept of this frog book for example transforms a little bit drier information and facts into brain friendly information that the child will retain that the child will be able to use as active information later on This discovery book is brain friendly and works in synchronization with your child s brain not against it If your child asks lots of questions you actually have the proof that providing discovery books to your child actually works because children who discover with their own senses and in an active and interactive way are able to develop intelligence on a much higher level than children who are not asking any questions and who are passively sitting in front of a TV all day long Stimulation of thought and contemplation increases intelligence and the brain power and TV kills the brain cells of your child Parents home schoolers alike are reporting unprecedented results from using her books as learning materials they get results even with children who usually hate reading books have to learn dry information
