knowledge of driver license applicants to determine whether they are able to operate their vehicles safely and thus qualify
for a driver s license Corollary to that assessment process is the jurisdiction s responsibility to provide drivers with the
information for which they are to be held responsible during the licensing exam and subsequently while operating their
vehicle on our nation s roadways The primary means of providing this information to drivers is the jurisdiction s basic driver
license manual This study was directed at identifying best practices with regard to the basic driver license manuals produced
by motor vehicle jurisdictions To identify best practices three types of information sources were consulted 1 driver license
manuals produced by motor vehicle jurisdictions throughout the country 2 driver safety information produced by relevant

and aggressive driving driver distraction seatbelt usage particularly with regard to the jurisdiction s primary or secondary
