Dupuytren's Disease Peter Brenner,Ghazi M. Rayan,2003-02-26 Morbus Dupuytren is particularly widespread among
northern Europeans However the therapeutic success rate often leaves much to be desired A 50% recurrence rate after
surgery indicates that the disease cannot be treated by surgery alone This book therefore adopts two parallel approaches
emphasis is firstly placed on the systemic character of morbus Dupuytren in context with other connective tissue diseases by
a description of the biochemical and molecular biological changes in the diseased connective tissues secondly a diversified
picture of the given anatomical facts serves to explain the employment of the various therapeutic approaches Further a
description is given of the current surgical procedures Cosmopolitan ,1912 Illustrated Catalogue of Books, Standard
