skills of Leonardo da Vinci who was trained in anatomy by Andrea del Verrocchio In 1489 Leonardo began a series of anatomical drawings depicting the human form His surviving 750 drawings from two decades represent groundbreaking studies in anatomy However none of Leonardo s Notebooks were published during his lifetime they only appeared in print centuries after his death Brussels born Andries van Wesel Andreas Vesalius professor at the University of Padua is deemed to be the founder of modern anatomical reference with his 1543 work *De Humani Corporis Fabrica Libri Septem* On the fabric of the human body in seven books An Italian contemporary was Bartolomeo Eustachi who supported Galen s medical theories Among other discoveries he correctly identified the Eustachian tube and the arrangement of bones in the inner ear His Anatomical Engravings were completed in 1552 nine years after Vesalius s great work but remained unpublished until 1714 These are just two entries in a book brimming with an abundance of important illustrated works with some more primitive examples from the 15th century up to the 42nd edition of Gray s in the 21st

the other hand deals with the internal mechanisms and the processes that work towards sustaining life. These can include biochemical and physical interactions between various factors and components in our body. Your study of anatomy and physiology will make more sense if you continually relate the form of the structures you are studying to their function. This coloring book will try to assist you in that process. Human Anatomy and Physiology Coloring Book is visually stunning step by step introduction to human body system. Focus on Human Biology Carl E. Rischer, Thomas A. Easton, 1995. In an effort to enhance the way students think about life, their bodies, and what it means to be human, this book introduces human biology from biochemical basics to traditional body systems. This helps students prepare for many complex issues facing them today.
