Cardiovascular Imaging Arterial And Aortic Valve Inflammation And Calcification:

Cardiovascular Imaging Elena Aikawa, 2014-11-03 This book provides comprehensive reviews on our most recent understanding of the molecular and cellular mechanisms underlying atherosclerosis and calcific aortic valve disease CAVD as visualized in animal models and patients using optical molecular imaging PET CT ultrasound and MRI In addition to presenting up to date information on the multimodality imaging of specific pro inflammatory or pro calcification pathways in atherosclerosis and CAVD the book addresses the intriguing issue of whether cardiovascular calcification is an inflammatory disease as has been recently supported by several preclinical and clinical imaging studies In order to familiarize researchers and clinicians from other specialties with the basic mechanisms involved chapters on the fundamental pathobiology of atherosclerosis and CAVD are also included The imaging chapters written by some of the foremost investigators in the field are so organized as to reveal the nature of the involved mechanisms as disease progresses Coronary Artery Disease and The Evolution of Angioplasty Devices Martin W. King, Tushar Bambharoliya, Harshini Ramakrishna, Fan Zhang, 2020-05-18 In this concise but authoritative book the authors take the reader through the epidemiology risk factors and the basic mechanism of coronary artery disease In addition they explain how coronary microvascular dysfunction can lead to angina even after successful angioplasty following a heart attack The methods for diagnosis and the options for treatment are explained ending with a discussion of the evolution of coronary angioplasty from balloon catheters to novel fully resorbable polymeric drug eluting stents Enclosed is a list of currently available commercial devices as well as a listing of experimental products under research and development so that readers can appreciate the serious nature of this disease and have an understanding of how the medical device sector is attempting to address this major healthcare problem Globally in 2010 ischemic heart disease was the cause of 13.3% of all deaths In the US alone the direct medical costs from coronary artery disease and stroke are currently estimated to be 126 billion per year and are expected to rise to 309 billion by 2035
