Shute, 2003-06-29 The first International Conference on Intelligent Tutoring Systems ITS was held ten years ago in Montreal ITS 88 It was so well received by the international community that the organizers decided to do it again in Montreal four years later in 1992 and then again in 1996 ITS 98 differs from the previous ones in that this is the first time the conference has been held outside of Montreal and it s only been two years not four since the last one One interesting aspect of the ITS conferences is that they are not explicitly bound to some organization e g IEEE or AACE Rather the founder of these conferences Claude Frasson started them as a means to congregate researchers actively involved in the ITS field and provide a forum for presentation and debate of the most currently challenging issues Thus the unifying theme is science This year s hot topics differ from those in the earlier ITS conferences as they reflect ever changing trends in ITS research A few of the issues being examined at ITS 98 include Web based tutoring systems deploying ITS in the real world tutoring and authoring tools architectures and knowledge structure and representation *Proceedings of the 2nd International Conference on Education Research* Florinda Matos, Isabel Flores, Susana Martins, The Proceedings of the 2nd International Conference on Education Research 2025 includes academic research papers PhD research papers Master s Research papers and work in progress papers which have been presented and discussed at the ICER 2025 conference The proceedings are of an academic level appropriate to a professional research audience including graduates post graduates doctoral and post doctoral researchers All papers have been double blind peer reviewed by members of the Review Committee Technology Enhanced Learning Erik Duval, Mike Sharples, Rosamund Sutherland, 2017-05-11 This book gives an overview of the state of the art in Technology Enhanced Learning TEL It is organized as a collection of 14 research themes each introduced by leading experts and including references to the most relevant literature on the theme of each cluster Additionally each chapter discusses four seminal papers on the theme with expert commentaries and updates This volume is of high value to people entering the field of learning with technology to doctoral students and researchers exploring the breadth of TEL and to experienced researchers wanting to keep up with latest developments **Mathematicians and Education Reform, 1989-1990** Naomi Fisher, Harvey Keynes, Philip Wagreich, 1991 Educational issues are receiving a great deal of attention in the mathematical sciences community as concern rises over the quality of instruction in the nation s schools colleges and universities Insuring a mathematically literate population and increasing the number of students pursuing careers in mathematics science and engineering are high on the list of priorities Mathematicians can make important contributions to the educational reform process The present volume is the second in the series Issues in Mathematics Education launched in 1990 by the Conference Board of the Mathematical Sciences and published by the AMS and the Mathematical Association of America The purpose of the series is to stimulate the flow of information among mathematical scientists education specialists and teachers about
