Generalized Kernel Equating with

Applications in R Marie Wiberg, Jorge Gonzalez, Alina A. von Davier, 2024-11-01 Generalized Kernel Equating is a comprehensive guide for statisticians psychometricians and educational researchers aiming to master test score equating. This book introduces the Generalized Kernel Equating (GKE) framework providing the necessary tools and methodologies for accurate and fair score comparisons. The book presents test score equating as a statistical problem and covers all commonly used data collection designs. It details the five steps of the GKE framework: presmoothing, estimating score probabilities, continuization, equating transformation, and evaluating the equating transformation. Various presmoothing strategies are explored, including log linear models, item response theory models, beta4 models, and discrete kernel estimators. The estimation of score probabilities when using IRT models is described, and Gaussian kernel continuization is extended to other kernels such as uniform, logistic, epanechnikov, and adaptive kernels. Several bandwidth selection methods are described. The kernel equating transformation and variants of it are defined, and both equating specific and statistical measures for evaluating equating transformations are included. Real data examples guide readers through the GKE steps with detailed R code and explanations are provided. Readers are equipped with an advanced knowledge and practical skills for implementing test score equating methods.

In *What Every Elementary Teacher Needs to Know About Reading Tests*, From Someone Who Has Written Them, Fuhrken takes the mystery out of reading tests. He explains how reading tests are created, how standards are interpreted and assessed, and how students can apply their knowledge of reading to standardized tests. *What Every Elementary Teacher Needs to Know About Reading Tests* sets the record straight about the myths and realities of tests and offers extensive practical strategies that help students perform well on test day.
