

Chapter 2 Active Reading Guide

The Chemical Context of Life

This chapter covers the basics that you may have learned in your chemistry class. Whether your teacher goes over this chapter, or assigns it for you to review on your own, the questions that follow should help you focus on the most important points.

Section 1

1. Define and give an example of the following terms:

Term	Definition
matter:	All physical substances.
element:	Chemical substances that cannot be broken down
compound:	A mix of two or more elements.

2. What four elements make up 98% of all living matter?

Carbon, Oxygen, Hydrogen, and Nitrogen

3. What is the difference between an *essential element* and a *trace element*?

While essential elements are needed in large quantities for an organism to live a healthy life, trace elements are needed in very little amounts.

Section 2

4. Sketch a model of an atom of helium, showing the electrons, protons, neutrons, and atomic nucleus.

5. What is the atomic number of helium? 2 Its atomic mass? 4

Biosafety Measures, Technology Risks and the World Trade Organization Alessandra Guida,2022-12-23 This book examines the work of the World Trade Organization WTO with a focus on the capacity of its judiciary to strike a reasoned balance between free trade in biotechnology and biosafety as to promote the 2030 Agenda for Sustainable Development and its Sustainable Development Goals By adopting an innovative interpretation of the precautionary principle and proportionality analysis the work offers normative suggestions to develop what the author terms a constructive bridge of knowledge between decision makers scientists social experts and expert witnesses which can support a judicial balance by design rather than by chance Biotechnology is sometimes regarded as a panacea for modern

day challenges such as feeding a growing world population and counteracting climate change problems and a means of offering significant economic opportunities However biotechnology can present uncertain though serious risks to human health and the environment i e biosafety Trading biotech products magnifies these risks and benefits globally This book explores the topical though still underexplored question of how to find a point of equilibrium between the revolutionary advancement offered by technology and the need to safeguard biosafety from uncertain though potentially irreversible technology risks It offers a thorough analysis of normative judicial and epistemic issues hindering a reasoned balance between trade and non trade interests under the WTO The work offers practical relevance for the resolution of legal disputes in contexts of uncertainty as well as innovative theoretical contributions It will be a valuable resource for policymakers working on precautionary governance and management scholars in the areas of trade law human rights law and environmental law law students and practitioners as well as NGOs working in the field of new technologies biosafety sustainability and food safety
