Q.1: What is Newton's corpuscular theory of light?**Ans:** This theory which was proposed by Newton is given briefly as under:

- Light consists of tiny (minute) particles called corpuscles.
- These corpuscles are emitted from a source of light (like sun).
- These corpuscles are travelled in a straight line.
- When these particles enter in the eyes, they create the sensation of sight.
- Velocity of light in denser medium is greater.

Q.2: What is Huygens's waves theory of light?**Ans:** Huygens proposed a theory known as wave theory of light. According to this theory:

- Light is a form of energy and it travelled in the form of waves.
- Medium was essential for the propagation of waves therefore It was assumed that all space was filled with a hypothetical medium called ether.
- Waves in different media propagate with different speed.
- Waves of different wavelength bend differently.
- The waves of light were so tiny that there had no visible distortion in typical mirrors and lenses and in the formation of shadow.
- Wave theory explained the rectilinear propagation of light, formation of shadow, reflection, refraction and a few other properties of light.

Q.3: What is quantum theory and dual nature of light?**Ans:** In 1905, Max Plank concluded after experiment that radiation was emitted in the form of small packets of energy.

- When the light falls on a metal surface, electrons are emitted from it.
- The physical nature of light was not that of a wave but of little packets of light energy called photons.
- Light has a dual nature. Sometimes it behaves as a particle and sometimes as a wave. It never exhibits both characteristics at the same time.
- It explains the existing phenomenon of light through empty space.

Thomas Aquinas: Basic Philosophical Writing Thomas Aquinas, 2018-10-30 This volume contains new translations of the essential philosophical writings of Thomas Aquinas from the *Summa Theologiae* and *The Principles of Nature*. The included texts represent the breadth of Aquinas's thought addressing causality, the fundamental principles of nature, the existence of God, how God can be known, how language can be used to describe God, human nature including the nature of the soul, free will, and epistemology, happiness, ethics, and natural law. The goal of these translations is twofold: to allow Aquinas to speak for himself but also to make his thought accessible to the contemporary reader without the burden of unnecessary adherence to convention. A thorough introduction to Aquinas and his ideas is included, as is a series of useful appendices connecting Aquinas's arguments to those of Anselm, Scotus, Ockham, and others.
