**War and Conflict in Africa** Paul D. Williams, 2013-04-26 After the Cold War Africa earned the dubious distinction of being the world's most bloody continent. But how can we explain this proliferation of armed conflicts? What caused them and what were their main characteristics? And what did the world's governments do to stop them? In this fully revised and updated second edition of his popular text, Paul Williams offers an in-depth and wide-ranging assessment of more than six hundred armed conflicts which took place in Africa from 1990 to the present day, from the continental catastrophe in the Great Lakes region to the sprawling conflicts across the Sahel and the web of wars in the Horn of Africa. Taking a broad comparative approach to examine the political contexts in which these wars occurred, he explores the major patterns of organized violence, the key ingredients that provoked them, and the major international responses undertaken to deliver lasting peace. Part I: Contexts provides an overview of the most important attempts to measure the number, scale, and location of Africa's armed conflicts and provides a conceptual and political sketch of the terrain of struggle upon which these wars were waged. Part II: Ingredients analyses the role of five widely debated features of Africa's wars: the dynamics of neopatrimonial systems of governance, the construction and manipulation of ethnic identities, questions of sovereignty and self-determination, as well as the impact of natural resources and religion. Part III: Responses discusses four major international reactions to Africa's wars: attempts to build a new institutional architecture to help promote peace and security on the continent; this architecture's two main policy instruments, peacemaking initiatives and peace operations; and efforts to develop the continent. **War and Conflict in Africa** will be essential reading for all students of international peace and security studies, as well as Africa's international relations.

**Contemporary Conflict Resolution** Oliver Ramsbotham, Tom Woodhouse, Hugh Miall, Harmonie Toros, 2024-10-11 The indispensable guide to conflict resolution in a troubled world. Conflict prevention and resolution, peacekeeping and peacebuilding have never been more important as priorities on the global agenda. The wars in Ukraine and Gaza and tensions between the major powers in what is now a multi-polar world require new conflict resolution responses. The fifth edition of this hugely popular text offers a commanding overview of today's changing conflict landscape and the latest developments and new ideas in the field. Fluently written in an easy-to-follow style, it guides readers carefully through the key concepts, issues, and debates, evaluates successes and failures, and assesses the main challenges for conflict resolution today. Comprehensively updated and illustrated with new case studies, the fifth edition returns to its favoured twelve-chapter format. It remains the leading text for students of peace and security studies, conflict management, and international politics, as well as policy makers and those working in NGOs and think tanks.

**Nuclear Weapons and International Law in the Post Cold War World** Charles J. Moxley, 2000-06-30 This book addresses the issue of the legality of the use of nuclear weapons under international law. It includes forwarding remarks by Robert S. McNamara, David W. Leebron, and Kosta Tsipis. Moxley analyzes the question in light of the July 1996 advisory opinion issued by the International Court of Justice, the law as articulated by the United States, and generally recognized facts as to the characteristics and effects of nuclear weapons. He

concludes that the use of nuclear weapons is per se unlawful under the rules of international law and facts recognized by the United States Nuclear Weapons and International Law in the Post Cold War World is an unprecedented exploration of the application of the necessity proportionality and discrimination of principles of international law to nuclear weapons
