

**Lesson Outline****LESSON 3*****DNA and Genetics*****A. The Structure of DNA**

1. Genes provide directions for a cell to assemble molecules that express traits such as eye color or seed shape.
2. Chromosomes are made of proteins and deoxyribonucleic acid, or DNA, which is an organism's genetic material.
3. Strands of DNA in a chromosome are tightly coiled like a telephone cord.
4. The work of several scientists revealed that DNA is shaped like a twisted ladder, or a(n) double helix.
5. DNA is made of nucleotides, which are molecules made of a nitrogen base, a sugar, and a phosphate group.
6. There are four nitrogen bases—adenine (A), cytosine (C), thymine (T), and guanine (G).
7. Replication copies a DNA molecule to make another DNA molecule. It produces two identical strands of DNA.

**B. Making Proteins**

1. The DNA of each cell carries a complete set of genes that provides instructions for making all the proteins a cell requires.
2. Segments of DNA that are not parts of genes are often called junk DNA.
3. Ribonucleic acid, or RNA, is a type of nucleic acid that carries the code for making proteins from the nucleus to the cytoplasm.
  - a. Like DNA, RNA is made of nucleotides.
  - b. Unlike DNA, RNA is single-stranded and has the sugar ribose. It has the nitrogenous base uracil instead of thymine.
4. The process of making mRNA from DNA is transcription.
5. The three types of RNA are transfer RNA, ribosomal RNA, and messenger RNA.
6. The process of making a protein from RNA is called translation.

# Chapter 1 introduction To Genetics Continued Answer Key

**William Glassman, Marilyn Hadad**

## **Chapter 1 introduction To Genetics Continued Answer Key:**

DNA Technology I. Edward Alcamo, 2001 Gives the educated layperson a survey of DNA by presenting a brief history of genetics an outline of techniques and indications of breakthroughs in cloning and other DNA advances This book helps students business people lawyers and jurists gain confidence in their ability to understand and appreciate DNA technology and human genetics

**Human Genetics** Ricki Lewis, 2008 Human Genetics Eighth Edition is a non science majors human genetics text that clearly explains what genes are how they function how they interact with the environment and how our understanding of genetics has changed since completion of the human genome project It is a clear modern and exciting book for citizens who will be responsible for evaluating new medical options new foods and new technologies in the age of genomics

**Pharmacogenomics in Drug Discovery and Development** Qing Yan, 2022-09-06 This new edition offers a state of the art and integrative vision of pharmacogenomics by exploring new concepts and practical methodologies focusing on disease treatments from cancers to cardiovascular and neurodegenerative disorders and more The collection of these theoretical and experimental approaches facilitates problem solving by tackling the complexity of personalized drug discovery and development Written by leading experts in their fields for the highly successful Methods in Molecular Biology series the book aims to provide across the board resources to support the translation of pharmacogenomics into better individualized health care Authoritative and up to date Pharmacogenomics in Drug Discovery and Development Third Edition aims to aid researchers in approaching the challenges in pharmacogenomics and personalized medicine with the introduction of these novel ideas and cutting edge methodologies

Police Response to Mental Health in Canada Uzma Williams, Daniel J. Jones, John R. Reddon, 2019-08-28 The overwhelming majority of police calls involve individuals with mental health experiences and yet limited resources exist to prepare first responders for these interactions Police Response to Mental Health in Canada addresses this gap in the field providing practical guidance to police studies students on how best to respond to mental health related calls in both critical and non critical situations In addition this book focuses on the mental health of policing professionals by addressing common mental health symptoms and providing strategies to improve the mental health wellness of policing professionals Aligned with the Diagnostic and Statistical Manual of Mental Disorders Fifth Edition DSM 5 criteria this text provides in depth explanations of the mental health conditions commonly encountered in policing including mood psychosis personality substance abuse and post traumatic stress disorders Written in an accessible style this book includes pedagogical tools such as scenario based learning case studies reflection questions group activities and chapter summaries to reinforce the learning objectives outlined at the start of each chapter With the increasing demand for law enforcement officials to be better informed and prepared to interact with those experiencing mental health issues this is a timely resource for students in college and university police studies programs

**FEATURES** Learning objectives case studies and discussion questions Contributions from leaders in fields of health services psychology criminology policing and

corrections Discussion of Canadian issues that are relevant across the country including police relations with Indigenous populations and incidents of gang related violence
