Norman Ridley

Chapter 1 section Two Superpowers Face Off:

Anarchy, Order and Integration Harvey Starr, 2025-12-10 Most observers agree that the global arena is in the midst of multiple changes. The elements that create and intensify global interdependencies have been expanding rapidly, generating questions about the viability of the state and the viability of the state-centric system that has existed for over 500 years, as well as what sorts of structures and behaviors might replace them. And yet much of the analysis is not helpful in understanding the condition of the international system because it either fails to define the meaning of terms such as interdependence and order or treats these as new problems ignoring many important ideas that have developed over the years about international politics. One of our most accomplished scholars in international affairs, Harvey Starr, offers a fresh and original analysis of the nature of the international system. Starr argues that the global system can best be understood as the consequence of states adapting to changing interdependencies. States do remain important in this system, but the reality they adapt to is changing. Thus the environment surrounding states is important not because it is anarchic, as argued by structural realists such as Waltz, but because environmental conditions have changed, thereby changing the meaning and significance of such structural characteristics as anarchy. Starr argues that we must recognize that the modes by which states adapt to change in the international system lead to changes in both the states themselves and in their environment. This book will appeal to scholars of international relations in political science and economics, as well as to policy makers and analysts interested in understanding change in the international system.

analysis and exploration of hit TV show *Heroes* from experts in the field of TV analysis. **When The World Stood on the Brink of Nuclear War** Norman Ridley, 2025-12-30 The post-war world was dominated by the U.S.A. and the U.S.S.R. but the events of 1956 exposed their limitations. On 22 October 1956, following Egyptian leader Gamal Abdel Nasser's nationalisation of the Suez Canal, British Prime Minister Anthony Eden secretly met with French and Israeli leaders in Sevres, France. They agreed that Israel would invade Egypt with Britain and France intervening under the guise of peacemaking to secure control of the canal and topple Nasser. On 23 October, far from the Middle East, hundreds of thousands of protesters in Budapest opposed Soviet occupation, tearing down Stalin statues. The uprising escalated as the Soviet Red Army intervened, leading to twelve days of violence, thousands killed or injured, and 250,000 Hungarians fleeing their country. Britain and France withdrew from the Suez after nine days of fighting, their ambitions thwarted by international pressure and canal closure. The U.S. and U.S.S.R. struggled to influence these events. The U.S. preoccupied with domestic elections and the threat of Soviet nuclear retaliation could not support Eastern European movements. Soviet actions during the Hungarian uprising weakened their global image. Norman Ridley's analysis reveals how these crises highlighted the limitations of superpower influence. Despite their nuclear strength, the U.S.A. and U.S.S.R. faced challenges they could not overcome, showing their mutual
