(Chapter – 1) (Variations in Psychological Attributes) (Important Questions)

(Class – XII)

Short Answer Type Questions

Question 1:

What are the critical attributes of assessment for a psychologist?

Answer 1:

Intelligence: The global ability to understand the world, think rationally and logically, and use available resources effectively to meet challenges.

Aptitude: It refers to an individual's potential to acquire new skills.

Interest: It refers to an individual's decision to engage in one or more particular activities in relation to him relative to others.

Personality: It refers to the strong qualities of a person that make him/her stand out from others. Personality assessments help explain a person's behavior and predict how they will behave in the future target, etc.

Values: Refers to a person's strength and enduring beliefs about ideal behavior. Assessing values helps us understand a person's general values (e.g. political, religious, social or economic).

Question 2:

How do psychologists characterize and define intelligence?

Answer 2:

For psychologists, intelligence is a key parameter that indicates individual differences. The characteristics of an intelligent person are sharpness of mind, quick wit, rapid learning, and the ability to understand context. We defined the environment as the ability to successfully discuss it. Gardner and Sternberg psychologists state that intelligent individuals not only adapt to their environment, but actively modify or shape it.

Question 3:

List some characteristics of an emotionally intelligent person.

Answer 3:

The characteristics of emotionally intelligent persons are:

- Perceive and be sensitive to your own feelings and emotions.
- Perceive and be sensitive to other people's emotions by paying attention to their tone, body language and facial expressions.
- Relate your emotions to your thoughts so that you take them into account while solving problems or making decisions.
- Understand the powerful influence of the nature and intensity of your emotions.
- Control your emotions and their expression while dealing with self and others to promote harmony and peace.

Question 4:

Please analyze the characteristics of the creativity test.

Answer 4:

Creativity tests are characterized by:

One of the most important features is the Creativity Test. It's open-ended, so you can come up with different answers to the questions and problems that come up based on your own experience. The Creativity Test involves an insane variety of thinking and the ability to generate a wide variety of ideas. The test requires people to use their creative thinking. For example, the ability to come up with different ideas about a particular topic/situation, different ways of looking at things, problems, or situations. New relationships between seemingly unrelated things, perception of things, the ability to infer cause and effect, the ability to put things in new contexts, etc.

A Syllabus and Notebook for the Study of Social Psychology ,1929 "The" Philosophical Review ,1898 Principles of Ethics James Henry Dunham,1929 An Introduction to Social Psychology Luther Lee Bernard,1926 The present Introduction to Social Psychology represents an attempt at a more synthetic type of treatment of the field than has ordinarily been given It seems to the writer that the time has arrived when schools of social psychology may properly be regarded as obsolete and the subject as a whole may be presented systematically In a sense social psychology overlaps a very large portion of social science and of psychology and education In this respect it is central to all psychological and social science disciplines This fact necessarily renders the content of social psychology voluminous It is no longer possible to treat this subject adequately in small compass The text books which have so far appeared although for the most part excellent from their several viewpoints are nevertheless but partial treatments So notably true is this that there exists a marked controversy as to what properly constitutes social psychology In Part I of this volume an attempt has been made to bring this controversy into relief for the purpose of enabling the reader to see the subject as a whole Originally the writer intended to publish this volume in five parts to make the

synthetic treatment more pronounced But the length of the volume as thus planned was prohibitive and it was decided to change the plan somewhat The synthetic character of the treatment has been retained but the detailed presentation of the process of the development of personality and of self and social consciousness has been reserved for a second volume The present volume treats the subject from the standpoint of the more objective factors which integrate the personality and its responses in a social environment Throughout it has been the intention of the writer not only to make the treatment complete in itself but to keep the presentation on such a level that the volume can be used successfully as a second book in social theory following directly upon the introductory course in sociology in departments sociology If the approach to the social sciences is a psychological one the organization of this volume should make it available as an introduction to the first course in sociology economics politics and more advanced courses in history and literature in those departments which care to use it in this way That social psychology will ultimately be regarded as a necessary introduction to the several social sciences and the literatures can scarcely be doubted While the present volume is intended for undergraduate students it is hoped that it may also be used profitably in more advanced courses in combination with the more extended treatment of the subjective aspects of personality development later to be published Preface PsycINFO Database Record c 2006 APA all rights reserved

Research Methods for Social Psychology Dana S. Dunn, 2012-11-28 The 2nd edition of *Research Methods for Social Psychology* offers information on how to conduct empirical research in social psychology The author teaches readers to think like experimental social psychologists that is to use or develop explanatory theories and to manipulate and measure variables in order to explain the origin or purpose of some aspect of social life It provides information to perform research projects on human social behavior from start to finish from selecting a research topic to collecting and analyzing data to writing up and the results using the American Psychological Association's required format i e APA style Along the way they will learn about the particular ethical issues social psychologists face the logic of experimental design alternative research approaches sorting accuracy from error in research and how to orally present their findings among other issues This book contains up to date scholarship and emphasizes active learning through pedagogical activities and exercises designed to help students design and execute their own social psychological research *Social Psychology* Knight Dunlap, 1925 **Social**
