Kicklighter, Linda Kelly DeBruyne, Eleanor Noss Whitney, 1995 *Cases and Materials on the Law of Restitution* Andrew S. Burrows, Ewan McKendrick, James Edelman, 2007 *Cases and Materials on the Law of Restitution* is an authoritative and scholarly guide written by leading experts who have shaped and defined the law of restitution and unjust enrichment. Extensive coverage of cases and academic perspectives provides a rounded view of the subject. Introductions, notes, and questions enable readers to check their understanding of key issues. The second edition of this seminal title covers many important new cases and academic publications including Birk's absence of basis approach. The coverage reflects the continuing debates on questions such as: BL what is an enrichment? BL was the enrichment at the claimant's expense? BL what is the role of tracing? BL when will proprietary restitution be granted? BL when does change of position operate as a defence? BL and does corrective justice underpin this area of the law? The book's structure has been updated to reflect the judicial development of the law of restitution, providing a map through this complex subject. This book is invaluable for undergraduate, postgraduate, and doctoral students as well as academics working in the area. Principles of Organic Coatings and Finishing Shun Xing Zheng, 2019-10-29 This book provides an accessible way to learn about organic coatings and finishing. The coating materials are considered here from the angle of chemical reactions and mechanisms of film formation. The examples and exercises provided in here will also help the reader achieve technical insights into the subject and obtain a deep understanding of the principles underlying the technology. This book also provides the reader with the basic knowledge and skills required for handling mixtures. As rheological technology has been widely used in research papers for academic exchange and solving technical problems on organic coatings and finishing, this book collects and compiles a number of reference works on rheological technology, demonstrating how to use it in organic coatings and finishing. **Regression & Linear Modeling** Jason W.
