Bachelor Thesis from the year 2011 in the subject American Studies Literature grade 107 110 course American Studies language English abstract In this work what will be analyzed is the evolution over time of the famous phenomenon known as the American Dream The next three chapters will mainly focus on whether or not the dream led more immigrants to success or failure and also paying particular emphasis to how the dream was and is interpreted by most of the women living the American Dream This work is divided into three chapters starting from the discovery of the continent where the dream is best associated the United States of America Secondly understanding the meaning of the term American Dream its formation and who has used it throughout the course of its history It will also focus on how the dream will be analyzed in a more current twentieth century context and understanding nevertheless assessing the female dreamers through close analysis of a novel and a poem People have always had dreams We could acknowledge that today s dreams might be unrealistic because of corruption however the dreams that people had in the past were of a different nature Success only meant having the bare necessities a job food for your family new clothes a couple of times a year a house or an apartment and maybe even enough money to commute by transit Achieving this success implied much struggles sacrifice and hard work Looking back at the scenario it appears to have been a very harsh experience for those who had immigrated to America As a result of the many sacrifices that were made in pursuit of their own personal and familial goals such as monetary success and a better life of freedom and opportunity for their descendants Their goals consisted of only the basic life values such as personal freedom through equal rights and opportunity that we today consider to not only be essential to life but entitlements Thanks to the millions of hard working immigrants and the hundreds of thousands of soldiers and protestors who have died in the name of democracy and the rights and freedoms that today allow us to live a better life in pursuit of their own personal and familial goals it was the first immigrants to America who also helped build and sustain what is today a global economic and military powerhouse and international authority the United States of America *Strategic Reading* Jeffrey D. arts has a profound connection to our lived cultural identity Other books have documented the depiction of dogs in art and photography but few have reached beyond the subject's obvious appeal *Picturing Dogs Seeing Ourselves* draws on animal visual and literary studies to present an original and richly contextualized visual history of the relationship between Americans and their dogs Though the personal stories behind these everyday photographs may be lost to us their cultural significance is not Great Books of the Western World: The great ideas, 1952 **Thinking about Literature** Robert McMahon, 2002 Details a different system for teaching classic and contemporary literature in high school that is designed to keep students interested in what they are learning and understand the material **Transformations in the Sublime** John E. Markos, 1994 William Carlos Williams optimism a counter current to prevailing twentieth century pessimism was more than a matter of temperament It was grounded in American transcendentalism and English romanticism but expressed in a semi opaque modernist style disjunctive imagistic symbolic and both suave and colloquial Williams optimism along with his outgoing contact with people and things was an essential ingredient of the visionary idealism that was nurtured by Emerson Whitman the English romantics and other sources *Ideas in Things* establishes that Williams worldview is grounded in these sources Coleridge Keats Gerard Manley Hopkins Whitman and especially Emerson and describes the organic idealist assumptions that underlie Williams poetry Williams vision of organic unity undercuts the alienating dualism that has prevailed since Descartes and the scientific revolution of the sixteenth and seventeenth centuries In Williams view mind and nature though distinct are interrelated because both have their source in a common ground the ultimate and living source of all things This vision of the world as charged with the grandeur of God or of some value that escapes scientific and common sense scrutiny drove him to tireless experimentation with language and form His aim was to defamiliarize conventional language in order to reveal novel and unexpected qualities in things and even to discover the permanent universal in the common and ordinary Williams used free verse and visual prosody exact diction word play onomatopoeia and especially metaphor and symbolism to subvert both scientific and stock responses to the world His cubistic broken style freed his imagination by revealing the object or experience in quick eccentric flashes For Williams the all important imagination besides defamiliarizing the familiar in order to rediscover the universal was also a productive power the counterpart in the human level of the generative forces of nature An authentic product of the imagination was not merely a copy of reality but a new object in itself *Ideas in Things* shows that Williams objectivism drew on Aristotle's conception of imitation a true literary work had its own unique and necessary organization like an organism through which it represented the universal in human

affairs To demonstrate how Williams revised in order to create poems that were well made objects distinct from traditional verse forms as well as from casual free verse Donald W Markos examines several poems in progress from rough draft to published poem These discussions will prove illuminating to critic and scholar as well as to the practicing poet **English Studies in Canada** ,1979
